

If you did read *HIDDEN IN PLAIN SIGHT* you will recall the matter of the "three books" which to his mind, Nostradamus considered too dangerous to have hanging around. These same three books were mentioned in his advice to his young son in the letter titled the "Preface". The mention made was a bit of a smoke screen in that Nostradamus said he had fed the books to "Vulcan". The books were, however stashed inside the wall of his house. Sadly most had been damaged beyond reading by the time they were discovered.

The word "Vulcan" was, of course, a cipher, simply because Nostradamus could as easily have used the word "fire" ! The major deplorable problem then, came in the "translation" of these newly found quatrains and sixaines. The damage to the documents was in many cases beyond repair.

The other problem then became those having no knowledge of the "triple method" simply *corrected* the spelling - blaming this on the publisher instead of realising that Nostradamus was alive then, and quite capable of correcting this problem himself.

The result has become a bit of a guessing game - based on having seen the original quatrains published *during the lifetime* of Nostradamus. That is to say - from 1555 to 1566 there was ample time for the publisher to be "admonished" by Nostradamus and have the erstwhile miss spelling "corrected" back then! But the originals do still tell us many things which can be inferred in the remainder of Century Seven, Centuries Eleven and Twelve ~ that which we have left to read.

One thing learned (recently in *COMBIEN - WHAT DATE, HOW MANY?*) from the original quatrains was the word "Lan" [lan] appearing without an apostrophe [l'an] does not mean the word "year". It means in the Latin "either/or". This is a pointer telling us to take that line (or the quatrain) as an "either/or" form for decoding. Could this be the reason a former proof reader was given the task of collating these texts?

When put to the test - this discovery certainly did work!

It is with the *omissions* in the words and in the punctuation which one must "scrutinise" closely. In line four of 3 77 the often overlooked letters "pte" tell us to do exactly that. This same quatrain, 3 77 also has "Lan" for those who understand what this really means - saying clearly *either the year or the number* 1727.

Plus - *to scrutinise this closely*. Thus a clue to go to Centuries 1 quatrain 7 Line 2 word 7.

This word "prinfes" was referring to "learning removed" in October; the month in 3 77.

So, without the very original Centuries 7 43 onwards, Centuries 11 and 12 - I have collected three differing published spelling to try and establish that which is the most correct by comparing to the 1555 publications.

There is then the matter of the "codes within codes" (which the Hidden Texts told the collator to use).

This is comprised of extracting the Capitalized words from a line and or a quatrain and by using anagrams - to find the intended meaning. Even this is no good to anyone who does not have the Alchemy List.

The problem being, once again, people have "corrected" the "miss spelling". Some have applied a capital letter to a word (for instance "bourges" which did mean Bourbon), but it also meant not to include those words in the *codes within codes* ! The opposite has happened too. People have removed a capital letter because it did not seem to be a proper name of anything. There is an example of this here in 12 55, where "ville" has been published all in lower case - yet one version has this with a Capitalized "Ville". This means that *that* version is the one which needs to be depended on - and not the other two! Thanks to this detail, it seems that the third version will be the version to be considered for our purposes here;

In *CENTURIES 11 THE SIXAINES* were many hints provided in a numerical form.

These "numbers" ("six hundred and twenty one" for instance) are either a date, a quatrain number or something else. This is a subject which needs looking at more thoroughly and before Centuries 12 is commenced, Centuries 11 needs to have more complete closure.

~Δπ%Φ[1.61803399]~

Here is a list of those written numbers which appear so far only in the sixaines of Centuries Eleven:

In hindsight, it became obvious many omissions were made by me, not understanding the scheme set out when at first the sixaines of Centuries eleven and twelve were undertaken.

The cross references held in the lines of the Sixaines prove absolutely that Centuries 11 & 12 are real and beyond question by any "experts".

ENGINEER USAGE ENERGIES USED IN LANGUAGES... Energies in language. What an interesting concept. Is this what the Tower of Babel was really about? Different cultures with different languages of different energies? Then there is another way to look at this sentence. In very recent times, the ability of the spoken word to affect molecules in water and also to affect our very DNA ! This comes under the auspices of sound waves which then takes us to sonic effect leading from quantum mechanics/physics. I do have the beginnings of a forum titled *SQUEEZING THE WAVES*, which stemmed from 1 63. I at first thought this was jet propulsion because that line was about "through the skies/heavens". On further consideration, this is all about quantum mechanics. We had a term in the 1960s and 1970s which directly relates to this – it was called "vibes". Yes, good vibrations – and how right we all were!

- While researching 'ebonics' the "pillar of porphyry" quatrain came to my mind. Thinking in terms of a mineral for both the word 'ebony' and the word 'porphyry'. Working on the quatrains of Nostradamus is certainly like Forrest Gump's box of chocolates ... "you never know what you're gonna get"...
- Here is the result:

By the **three lilies** they will give her (Earth) such [similar] pause. This seems to me to be a reference to Matthew 24:22 Where he speaks of "shortening" the days for the sake of the "Elect" – when 20 minutes was "lost" from the clocks in April 2011 then again in June 2011. This was felt most around the Mediterranean and would have been also felt in the antipode of that area, which is off the East coast of New Zealand in the ocean. The following year earth was not quite where she would have been when the two asteroids; (which NASA never mentioned until after the event) had passed safely by. These asteroids Toutatis and companion will be back in four years from December 21 2012. This Elephant first appeared in Century 11 #39, (Elephant and the Wolf ²) then again in 11 #56 (Elephant and the Griffon). There must be a division amongst those from Cepheus because many lines hint they are Reptilian – so I have been taking this to mean they are negatives. They are not included in the Mazzaroth of the Second Coming which is composed of those from: ARGO, SIRIUS, ORION, AURIGA, PERSEUS and CASSIOPEIA = "the unholy Six"; where Argo/Oar and Cassiopeia are the two here to help the Earth and the other four are the "INSANE FOUR DUE". They orbit the sun right now. The alchemy list key for Cepheus is Arm. The arm which "holds the branches". And this must also be the **BRANCHES** in C 1 Q 2

TREE (Celt) NAME NAG (horse 2014): CLEAR MILNE (Schrödinger equation solution)

to summarise this: the function of a wave in a physical system over time (such as an orbit of a planet? Or influence on a large group of people, none of whom would individually agree, but all do agree – eg: the "wave" of spectators, or followers)

Abstract

The magnitudes of the spatial transients which are excited in the thermal neutron flux at a free boundary are discussed. As an example, the Milne problem in the two-group approximation is solved. The various contributions to the total flux and surface angular distribution due to the asymptotic, rethermalization and continuum terms have been compared and the limitations of diffusion theory for this type of problem pointed out. The solution of the transport equation is based upon a novel iteration scheme which shows promise of rapid convergence.

Abstract:

The classic **Milne problem of radiative transfer** is considered within the context of transport in a statistical medium. It is pointed out that the statistical nature of the medium leads to two different definitions for this Milne problem. Explicit analytic results are given for each definition, under the assumption of binary homogeneous Markov statistics. The two solutions are qualitatively as well as quantitatively quite different.

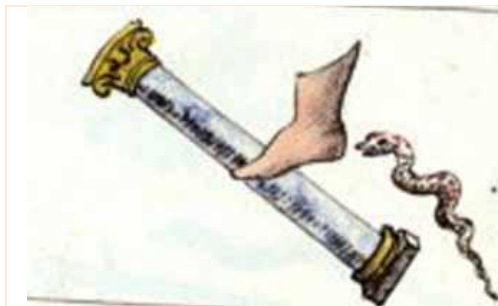

This is placed here amongst the Cepheus vignettes because the item held in the arm could be a branch – which would be the reference to Cepheus. If it is not a feather (Aquila). The two keys mean to use two of the "triple method" – one of which is the Alchemy List. The other is the Runic skies. Note the 12 spaces in the net? This is an OCD number of the Anu. The banner means the Milky Way. This is Sirius (apophys/pope) Reticuli (the Net around the shoulders) with the Serpent Draco (it is not Hydra which has a head at each end). Looks like the "feathered" serpent – or the year of If the item is the branch in the arm, it does mean Cepheus the King. 1 10 refers to Cepheus – described here

"This will be preceded by a solar eclipse more dark and gloomy than any since the creation of the world, except that after the death and passion of Jesus Christ. And it will be in the month of **October** that the great **translation** will be made and it will be such that one will think the gravity of the earth has lost its natural movement and that it is to be plunged into the abyss of perpetual darkness.

The "perpetual darkness" of Da Vinci's "All colours will be the same" – the sack cloth of the Bible...

LEO & THE SUN – A VERY LARGE SUN
The main differences between this and
Cesar's vignette, being this is a mature
Lion (Leo Major) and there is no red hat
He looks quite smug, doesn't he...

If they are all major dates – the first might be in Gemini (two people), then in Taurus, mentioning Cancer and in Leo
Possibly the first one was intended to go in the middle but if not, this Gemini is not in the same year as the other
dates. Celtic Leo is August 5 – September 1st which does encompass modern Virgo (DRAGON EN VIRGO)

The highlighting was already put in place when I found this in a private collection. The first one says “two men” but
one looks like a woman to me. The centre one says “lobster” (which means in Cancer, so saying Taurus and Cancer).
The last highlighting is on “de raize a la feblace du foleil”... parquoy foubz le throsne dudict foleil ilz paignoient le
lyode. For my computer to recognize the words it does need to be “repaired” to get a translation (not an
anagram) changing it to read: “de raize a la seblace du soleil... parquoy soubz le throsne du dict soleil ils paignoient le lyode

rays appearing as if (from) the sun
wherefore underneath (underground bases) their haven (paig/covering) drown
dictated from a sunny Leonine throne

The last line is ambiguous (as is everything). “a Sun” does not necessarily mean ours. Leonine throne – it is those from Chertan in Leo which are the shapeshifters, in the “jellyfish” craft which share their DNA. So these craft can appear to us as anything they want. Leonine in August and by the melting ices from the sun do drown.

The Courant number expresses the ratio of the distance travelled by a disturbance in one time step to the length of a computational distance An explicit method can suffer from numerical instability in case when Courant number is sufficiently large. The Courant number is inversely proportional to the square of grid spacing. Finally, the code gives "floating point overflow".

Major geological shift for planet: NOAA/NGDC image of the Atlantic crustal age of the ocean floor. Geologists have detected the first evidence that a passive margin in the Atlantic ocean is becoming active. The team mapped the ocean floor and found it was beginning to fracture, indicating tectonic activity around the apparently passive South West Iberia plate margin.

June 18, 2013 – The Extinction Protocol GEOLOGY –

A new subduction zone forming off the coast of Portugal heralds the beginning of a cycle that will see the Atlantic Ocean close, as continental Europe moves closer to America. Published in *Geology*, new research led by Monash University geologists has detected the first evidence that a passive margin in the Atlantic Ocean is becoming active. Subduction zones, such as the one beginning near Iberia, are areas where one of the tectonic plates that cover Earth's surface dives beneath another plate into the mantle — the layer just below the crust

Tectonic plates move the distance UK to Portugal (Tunisia to Sais in the hidden text) = a bit over 200 miles in longitude which would mean the Earth's axis tilts a bit more.

June 19, 2013 – TURKEY The Extinction Protocol – German and Turkish scientists on Tuesday said they had pinpointed an extremely dangerous seismic zone less than 20 kilometers (12 miles) from the historic heart of Istanbul. Running under the Sea of Marmara just south of the city of some 15 million people, this segment of the notorious North Anatolian fault has been worryingly quiet in recent years, which may point to a buildup in tension, they wrote.

Those creatures who are mentioned by naturalists as the natural enemies of the serpent were peculiarly honoured by the Egyptians, the hawk, the ibis, the ichneumon, the cat, the swine. That they fed on the serpent may be one reason why the Jews were ordered to hold them unclean (Lev 11). The poisonous serpent, known by the breadth of the head, was the representation of the enemy. The innocuous serpent or snake, whose head is slender and pointed, was the hieroglyphic figure of the progression of time, which its swift and noiseless motion well typifies.

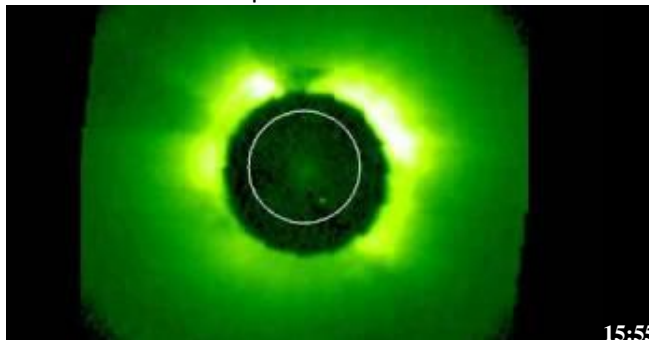

The Twelve Signs and their accompanying thirty-six Decans occupy the central group of the planisphere. In the circle of figures below, and enclosing that group, the five planets may be recognized, each in one of the "houses," or positions, traditionally, and from all antiquity, assigned to them. To the figures thus to be explained, no "tail" is appended; it cannot apply to them, as "this cometh," for they are circling continually, and as it were always present with us.

"One of the aliens touched her forehead," Angie said, "and a series of graphic images exploded" in her mind. She saw "a reddish-gold desert planet with two setting suns," a "galaxy," a "blood-red moon and a fiery orange sun exploding," and an "underground city" before she blacked out. When she regained consciousness, an alien told her their home was "Cassiopeia in the heavens," but that they had made a home for themselves on Earth before humans were created.

CORRECTION

INCORRECT ~ NOT FROM CEPHEUS. The 'crown' is a coronet, meaning a prince – of Sirius

LEFT: The crowned reptilian which we have been warned about all throughout the Hidden Texts.

This is the Visconti coat of arms which speaks of an event in Italy in the 5<sup>th</sup> century A.D.

Reptilians also arrive from Auriga

See the "thick lipped muzzle"?

It is here which a retraction needs to be put in place.

recently the texts said that Cepheus the king is "nice"...

so the "crown" here is not a crown, but a coronet of a prince – and that would be either Sirius (prince of dark men) or those from Leo/Chertan (not Regulus)

## MY QUESTION IS – WHY ? WHAT PROMPTED THIS SCULPTURE ?

### Footnotes

#### <sup>1</sup> Jschwjsch (from Billy Meier)

Pronounced "ish wish". Ancient Lyran for King of Wisdom.

[Ptaah](#) and [Pelegon](#) were two examples of an Jschwjsch.

The abbreviation of Jschwjsch is JHWH – JHVH [Heb. value #1366] or IHWH.

The ancient title of JHWH is a several million year old title brought by our Lyranic ancestors to Earth, unfortunately it's been falsified by many wrong teachings over the thousands of years.<sup>[1]</sup>

This title is given to a man who has reached a high level of knowledge, wisdom, truth, insight and most strict following of the Natural Creative Laws and Directives at all possible times and lives in recognition and realization of Universal Love. Enlil is a 'wrathful' YHWH Ptaah was an Jschwjsch

Ptaah is responsible regarding the spiritual teachings and the various developments on Earth, and two other planets.<sup>[2]</sup>

Ea called EyAh is pronounced OO-Yah or EWE YAH and it was the loving Ea (Enki) who gave the Ten Commandments to Moses. The confusion has been made by the abbreviation to the four letters of Y.H.W.H and people trying to pronounce it to match the pronunciation of Ewe.Yah, when YHWH is actually pronounced "Isch Wisch". The letter "Y" is also an "I"
