"These wombs were 2 feet vertically and 3 to 4 feet horizontally. These creatures... if you take them out of this womb..."

Here's what it would look like if they placed them in your hands. [reading] They have three fingers, two toes.

They're not human. The color is wrong. Looks blue-gray. They have a very thin skin and they're about 6 inches high.

These are what the test tubes look like. The room light was pink/purple, bright in some areas. Hundreds of these various stages of growth. In other words these tubes, these things that grow in here, are in various stages of growth.

Wispy hair, not quite a nose. The mouth looks sealed. The womb looks gray. Veins look dark gray. Creature white, pale eyes, dark lids.

Can't find a gender. Two toes, three fingers. Liquid amber color, not completely clear. Looks like the glass tube is about 5-foot high"

This is at Dulce facilities alleged jointly-occupied US/alien facility.

HORDES ~ MEDIEVAL HORDES

“Clone nursery” of hybrid human-alien fetuses drawn by abductee, Angie.

“One of the aliens touched her forehead,” Angie said, “and a series of graphic images exploded” in her mind. She saw “a reddish-gold desert planet with two setting suns,” a “galaxy,” a “blood-red moon and a fiery orange sun exploding,” and an “underground city” before she blacked out. When she regained consciousness, an alien told her their home was “**Cassiopeia in the heavens**,” but that they had made a home for themselves on Earth before humans were created. Source:

There seems to be some kind of breeding program. There is still some benefit that humans provide in breeding us or using us for hybrids. So somewhere, there still seems to be an interest and activity related to genetics. What that might be? earthfiles.com
