

# R ECONCILIATION OF DATES BETWEEN SHARS OF NIBIRU, THE ZODIAC AGES & 1 40 & 7 36 ARE WE REALLY IN 2013 OR 2014 ETC?

---

Should we deduct 324 years added by king Otto according to Guth, Illig and Niemitz?  
This would mean we are really in **1689 A.D.** at 2013 or **1690 A.D.** in 2014

---

By deducting 3,600 years or one shar [**orbit of Nibiru**] in retroverse from 1689 on the theory this is the true 2013 date:  
= **1,911 B.C** what happened then? This is close to the date some say for Thera, a likely event easily caused by the passing of Nibiru  
( if around 300 is removed it becomes ca 1611BC which is close to the other date for Thera by some, of 1620-1630BC)

- 3,600

= **5,511BC** the Hiberu new calendar?

- 3,600

= **9,111BC** Age of Leo Rising, ca 9,200BC, the date for the Great Giza Pyramid according to the astronomical clock  
therein and according to the Lost Clay Tablet 10 of Enki (Z. Sitchin) BUT

we have the date of 3123BC June 29 (calculated from the Köfels Austria clay tablet) as a new 'age', which is the Mayan age of  
3114BC according to Hancock & Bauval (after a recovery gap) is this when the days went from 360 – 365 per year?

this does not follow a shar, it follows the aten asteroid of Sodom & Gomorah

## WORKING FROM THE ZODIAC "AGES" IN THE 'PRECESSION OF THE EQUINOXES'

VIRGO from 11,271BC PRECESSES to LEO minus **2160**

9,111 \* BCE LEO RISING (add 1689 = 10,800 plus 2160 = 12,960 years ago: fits with many C14 dates of world-wide "events" )

- **2160** [average number] PRECESSING to:

CANCER = ends 6951 (+ 1689AD = 8640 years ago) PRECESSING

- **2160** to

GEMINI = ends 4791 (+ 1689AD = 5480 years ago) PRECESSING (the timing of Otzi the Iceman)

- **2160** to

TAURUS= ends 2631 (+ 1689AD = 4320 years ago) PRECESSING

- **2160** to

ARIES<sup>†</sup> = ends **471BC** plus **2160** PISCES = ends **1689 C.E** (NOW)

PISCES end = 1689AD into AQUARIUS (rising)

---

**11,271 BC + 1689 AD/C.E. = 12960** years, by two – 25,920 years, the full "precessional mill wheel" of all the 'ages'.

Nostradamus says Aquarius ends 3797 minus 1689 [now] = 2108 years which is very likely the correct number of years in this precession (length of time our sun takes to travel across the zodiac constellation of Aquarius)

---

\*11,200 years ago / ie: 9,200 the app. date in the pyramid plus 2013 = 11,213)

divide by 3,600 ... the number of shars (visits from Nibiru) – fourth visit due now

3,600 = 3.1111 shars and .1111 of 3,600 = 324 missing years

following 1620BC – 1630BC **if we are really in 2013**

which had been inserted ("more or less")

---

The "Establishment" Robert Ohotto says:

Age of Leo 11000 B.C. - 8000 B.C.

(Ohotto is stating that the Age of Leo commences **8,000BC**, for a period of 3,000 years back to Virgo)

The Age of Pisces (– **2400 A.D.**)

The Age of Aquarius (**2400 A.D.** – 4600 A.D.)

THREE HUNDRED odd YEARS OUT (IF we are in 2013)

*Jungian Synchronicity in Astrological Ages.*

Alice O. Howell. 1990. Theosophical Publishing House. p.146

---

<sup>†</sup>The age of Aries is not the full 2160 years & the age of Leo is more than 2160, but not likely to be 900 years more, but 600 years

There are six ages here – half of the 12; averaged.

‡ Crater Lake was formed

One year is 365 days in a row from any given point

PS: DEC 18 2013

This table was only constructed by me because I had a question. The question is this:

If we are not yet really into 2012-2013, then why are all the crop circles warning us now instead of waiting another three hundred odd years? Many dates in those crop circles have been construed to be of the times we are in right now – around the 2012/2013 period. What is the answer? Are the crop circles man made after all? The answer is no, and the proof for that lays within one example of the times the crop circles have been situated. The extra dimensionals and others who comit 'pen' to crop do not have the same frame of time which we do. A couple of the messages within some "circles" have been placed back to front, such as the WELLENSPIRALE pair – a 'before and after' pair in which the 1999 depiction is the 'after' and the 2006 shows the 'before' of the same event. Just the fact they are separated by seven of our years also points to a non human construct.

If humans want to give us a message, be it information or dis-information, they would do it while we still have the memory of it, since we do seem to have such short recall. Even the forums compiled a mere four years ago, which apply to these times needed to be published closer to the events indicated within those forums.

The *human designed* idea for the crop circles does not explain those which have been recorded since the sixteenth century. Nor does it explain the one hundred acre crop of green standing corn which *overnight* gave us the 'Azte/Maya' sunstone (and which the government erased the first day it appeared). To draw this on a piece of paper would take any one a long time, and to accomplish it without damaging the green standing corn left upright is also testament to a non human application.

There is another forum for the Hidden Texts of Nostradamus being constructed around the quatrains which speak of the missing "three hundred" and the links in those quatrains to king Otto are in evidence.

The single answer which comes to my feeble mind is this thought: "garbage in garbage out". Since computers were invented, they have been date coded according to the expected year number prevailing at the time of programming. This especially includes all those astronomical programs.

Have they all been using the wrong "start" date?

Project Camelot caught this photo of the one hundred acre crop "circle" just as the government was on its way to destroy the field. This was in either 2008, 2009 or 2010, could not find any reference to it today... in Texas I think

I just noticed what looks like a crop circle depiction of Earth in this picture at the lower left, always shown with an atmosphere (except in the WELLENSPIRALE pair, see here).

Then see the two "shadow Earths" at the lower left followed by three "X"s saying "three times further out"

This is possibly showing us the *proportion* of the main planet in the Nibiru system compared to Earth (lower left), since 'cement-spirit' is Quetzal.coatl/YHVH. Ea was 7Macau (according to our texts).

Names given for this illustration are the "Aztec Sunstone" or the Maya Long Count.

if you look closely, you will see these are not the exact same illustration

Proto Sanskrit above and  
Maya pictograms left

My thought when discussing this with others, is that the shadow governments are thoroughly aware of this anomaly and have USED it to engender FEAR

The best example of which is the *hoo haa* surrounding 2012 and 'prophecy'...

and for me the best *for instance* is that Nostradamus ONLY ONCE mentioned 2012, and that was NOT in a quatrain but in a hidden texts quatrain in "1 80 1 FEEL MIRACLES DEFLECTED R XII" Where 'R' is the rune for Sagittarius and St. Lucy's Day is December 13 in Sagittarius. (The asteroids missing Earth because of the 40 minutes removed in 2011)

Then a monster will be born of a very hideous beast: NIBIRU? In March, April, May and June great wounding and worrying.

See the spelling of March, April, May June? See how April has no Capital "A"? That is because those letters are not needed *sixth bright celestial light* can mean either a planet or a star. The sixth planet inwards is Mars, not so bright until recently due to Ison. Sixth planet outwards is Saturn – but if an asteroid is coming from the direction of a planet, one would need to know *when* to see where that planet is. Nostradamus did say "by fixed stars" so the direction of this asteroid is from the sixth brightest star in the heavens. Trouble is there are several opinions on this too. Vega/Capella/RIGEL/Canopus (the latter belongs to Argo)

*Then a monster will be born of a very hideous beast:* this is saying that an asteroid is carried (moved) by Nibiru.

The months mentioned are the "passing over" of Nibiru and are the same as those in the "letters in F.I.S.H." in 2 5

The "before" shot. Nibiru solar system is passing giving us a "shove". The little dot could be the asteroid which shoves the radioactive ocean off – see Earth with only an atmosphere, minus the ocean. This is what Da Vinci said. There are two views of this event, as if two different "people" are telling the same story one on each "side" of the view See the next view, next page

WELLENSPIRALE & NIBIRU SOLAR SYSTEM AT THE LEFT, ONE CROP CIRCLE IS CLOCKWISE & THE FOLLOWING ONE IS NOT. The other crop circle looking the same which appeared in 1999 is not the same. It is the view *from the other side*. This is the view of the Cassiopeians, the Elohm, since Nibiru is shown. Compare the two central subjects in each of the different year between the 1999 and the 2006 crop circles. The 2006 is the "before" and the 1999 is the "after" with our ocean "lifted" (see the pdf forum *DA VINCI & NOSTRADAMUS*)

The "after" picture, the 2006 crop circle is the "before" shot, here our ocean is left behind

the centre shows where Earth once was on the 365 day orbit

The blue circle is our moon moving away before we reach our final destination – the red circles are Earth. The radioactive ocean has been left behind – a rather ingenious way to fix the toul up caused by greedy "government". The means and manner are explained in *ANDROMEDA BOOTS UP THE PYRAMIDS*

TWO DIFFERENT VIEWS ONE FROM EACH SIDE – from a space station and a mother ship? BUT IT IS EARTH BEING MOVED ~ THREE ORBITS OUT... the consistent theme

## NOSTRADAMUS AND THE "MISSING 300"

to Steven Guth – *Climate Change – The Missing Truth (a worth-while read)*

[guthltd@comcen.com.au](mailto:guthltd@comcen.com.au)

My questions:

### Dendochronology:

Do scholars take into account that there was a "Little Ice Age"? Or do they make allowances for it? How?

Tree growth falls to a bare minimum during periods like this.

When climate does not fluctuate; but remains below zero year after year how can rings be counted?

The tree simply is in hibernation in an ice age.

The dates for the "Little Ice Age" and the "Maunder Minimum" conjoined, range from around 1350 to 1850

The same can be said following large volcanic eruptions which produce "nuclear winters".

Since no nuclear winter has been established as lasting exactly so many years and so many months – then the tree rings surviving that period cannot be reliably counted either.

They might well be counted – but is allowance made for a period of hibernation?

How many years did they "skip" a cycle? No one really knows

### Radiocarbon C14 dating:

Does anyone take into account the error variation due to bacteria encapsulation?

This can be up to 700 plus or minus years depending on the subject matter, and is the very reason the Shroud of Turin has been branded a fake.

Removing these two methods of "dating" and there is left only ice core testing for evidence, demographics and DNA.

"It is not important to explain the motivation of the emperor Constantine VII. I only want to demonstrate, that an action of rewriting and faking like this has happened. If it could happen in **Byzantium**, it might have happened at any other place, too. Moreover Theophanu, mother of **Otto III**, came from [my italics hp] Byzantium and was a niece of the emperor Tzismiskes (emperor from [supposedly] **969 AD until 976 AD [or...?]**), a descendant of the same dynasty as Constantine VII.

As to the question of who faked and why, there could be many speculations

Its seems that in this question surprises are ahead which could create trouble for many academic institutions"

Niemitz in the link in footnotes

Nostradamus has at least two quatrains and another two quateins (the texts hidden) regarding the missing three hundred years – and no one noticed!

What does this mean for the Maya Long Count calendar, which ends astronomically in 2013 – ?

I don't know - Nostradamus died 20 years before the current calendar was changed. Nostradamus stated time and again - the only way to have a trustworthy calendar is by using the movement of the stars... The long touted date of December 21/22 2012 did not escape an event, and a major event it was. Since 2003 real scientists have been warning us that the Gulf Stream, the Great Conveyor of the oceans is slowing down. That very week of late December 2012 two people wrote saying they had *witnessed* the *current reversing* around Norway where they live.

Nostradamus also said in 3 94 :

"for five hundred years *more or less* after [the publication of the Centuries]" his texts would be read, so if you use the date of his death, 1566 and add 500 you get to the year 2066 – (more or less) the same date of [a] Wormwood in the Bible. The hidden texts do provide a date for a Wormwood event – So this particular 500 years is well documented.

According to Isaac Newton, (who arrived at 2060) and the hidden texts of Nostradamus found by Allan Webber, which say "the seventh decade" and in the "year of the coq" – rooster – which is 2065, August...

Allan also found the same date by a totally different route (*A Fossicker's Guide to Nostradamus*

But if you add the number Nostradamus gave as his decoding key ... 458 to his publication date 1555 you get 2013. (this number was the year that "0" was first published – See the lines here which led to the finding of his cipher.)

Consequently Nostradamus is either saying his texts will no longer be read after 2013 or after 2066

## JAIN ZERO KEY

n the subject of more than one cipher key for numbers/dating – see the following lines from the hidden texts which explains how the Jain key was found, as well as saying there are plural keys. One really needs to simply cast one's mind over the almost impossible coincidence that anyone at all would find the code! The chances of prying eyes gaining the information in a given immediate time frame are practically nil. Nor even putting several people to the task. It requires *one* mind with a useful memory, it requires the Template and the knowledge of the "key" words. It was Alan Webber who accomplished part one of this. The word "Jain" as confirmation was well hidden just to top it off. To find all these lines *ad hoc* in documents with ten thousand lines and to recognise that any given one applied to any other given one was a task for years of work. Allan would have only had one key word to work from, "zero". The rest were simply "curious" to me so they were "collected" for "later". This is what the collator does, *collect and put together*. Just to show you how these lines first arrived to be collated, one original example is here for you to see for yourself.

Reiterating: explanation needed for the words "A YEAR" – any number of 365 days in a row from any given point

The YHVH/Enlil/Ruach Hibiru/Hebrew/Jews are sourced from the Azkhenazi which are the Bankster Cartel.  
We call them the "elite".

The fish head Mitre wearing Red Oannes/Dagon Loving Papacy represent those red Reptilian Anakim offshoot who got together with the Nicaean Council to edit a book called the bible.

This way, the opposing Cabals control humanity - pocket and soul - and are currently vying against each other for all the World.

8 10 2 U.N. GLORIFIED URSA [ANAKIM], OANNES [DAGON]:  
ORIGIN OF ORIGINAL FEUDING RELIGIONS

This answers everyone's question regarding what religion for Nostradamus, the abductee

Another question arises:

if Nostradamus was taken using a stargate...then did they apply the NAMES of the years we have now in common use to all the quatrains – simply because that is how we know them?

The reason I ask is this: if we still have 325 years before the real 'end' of the Maya calendar then why are all the crop circles appearing now - 325 years before these events?

I have relatives in Norway who say that the ocean current reversed the last week in December 2012.

For me – that means the end of the age we have just had and a new (mini) ice age.

It also means the Mayans were right.

Just because the News did not publicly say the Mayan "calendar" was right –

does not mean it did not happen

The archaeological gap is also corroborated by similar events in Byzantium – and in the quatrains of Nostradamus here...

CURE CERN- CLONE LOUT

Where "CERN" means time user and "clone" is genetic engineer. Yes, they did give themselves food for thought... Yesterday was spent working on the cusp of the age of Virgo into the age of Leo using Tablet 10 of Enki, which states the Great flood was caused by the passing of Nibiru, and of the loss of everything on Earth (such as woolly mammoths in Siberia) and Mars. The date of this flood followed by a mini ice age was between 9,600BC and 9,200BC. However, the missing three hundred years of Guth, Illig, Niemitz and Nostradamus (in two quatrains and a hidden text) should be allowed for. The astronomical date inside one of the "air vents" of the Great Pyramid says 9,200BC – when Leo was "rising".

See A TRUE DATE FOR THE GREAT PYRAMID on page 13 of the Nostradamus web site.

The pyramids at Giza and the Sphinx were constructed after the flood receded, with the promise of never letting that happen again. The architect of the Giza complex Thoth/Ninghizzida was the original face of the sphinx. The current face is HatShepSut according to the hidden texts "Leo blurred Zee". By counting the shars (the orbit of Nibiru according to Enki's texts) back from around 9,200/9,300BC we can arrive at Current Computer date 1620/30BC when Thera was set off by Nibiru, sending the Hyksos looking for grazing. Their migration would have been instantly on losing their own grasses to ash and pumice and salt from tsunamis. The date they arrived to take over Egypt with their chariots is very closely allied with Thera... and that date is right on two shars from the great flood, allowing for recovery times. Using the date around 1620BC to our now, is around the 3,600 years.

We are due right now for another visit from the Nibiru system.

Is the word "jà" at all used anymore or is it an archaic word? Or even regional?

I was researching the etymology of the word 'prier' on the XMLittré site and found a sentence that contained the word "jà", which I was unable to find in the dictionary. In the etymological dictionary it defines the word as meaning

1. déjà 2. certes (adv.). Here is the original sentence I found it in:

1. Déjà AS BEFORE 2. certes (adv.) CERTAINLY

On a dit prier à Dieu, prenant prier comme verbe neutre. Aussi de tous étiez jà regretté, Fors de l'envie et de votre bon frère ; Lui ne voyant en vous de sainteté Priait à Dieu qu'il vous mît vite en terre, Pour accourir d'autant l'iniquité, Vers adressés par Piron à Voltaire, le 3 déc. 1723. #### Enki says in Tablet 10 (Z Sitchin)

Now this is the account of the new Place of the Celestial Chariots, In the station of the Constellation of the Lion  
Let us beside the twin peaks a monument create, the Age of the Lion let it announce"

This was in the Age of Leo, same date as Atlantis sinking, same date the Giza pyramids were built... a promise was made by the Anakim to never allow a flood like this again (because it destroyed their own works as well). This was all caused by Nibiru passing too close. This passing sent the atmosphere off Mars and its ocean too.

The Age of Leo was stated as the date in ENKI'S LOST TABLET 10, and it is the reason for the Sphinx .

This was originally built with the head of THOTH (says Enki) - but later it became the face of HatShepSut - which it is now.

(The rebuilding, says Hancock, thinking the original head was a lion, but it represents the Age of Virgo in the Denderah zodiac). Nostradamus is the one who says it is the "crowned queen" Hatshepsut. The Age of Leo is - circa 9,160 BC to - circa 11,323 = LEO. This fits in perfectly for events two shars later :- 1620 - 1630 BC (Current Computer date) when Thera was set off by Nibiru, which sent the Hyksos packing to go to Egypt for grazing. The astronomical date inside an "air vent" of the the great pyramid happens to be 9,200BC (the Age of Leo - RISING) :- just as Robert Schoch said.

The army denied entry to the city (Cheetham) Cheetham took exercit from the Latin *exercitus*/army because she could not envision fiscal **years** being denied entry to society (cit) or to a citation.

Without the original quatrain I cannot establish if it is cite or cité, but it matters not.

The confirmation is in the word "Dans", which can and might really be D'ans.

desniee Cheetham has this as *denied* but *destinee* or "destiny" means *future travels* – (not necessarily *arrivals*)

"denied" is *dementi* or *rejeté, refusé* or *contesté* ... yet those years **were** denied

That made me laugh – yes, stand alone power source which sometimes can be a nuisance and yes, stuck insulation to new roofing just these last few days) SO FAR (away) POET FOR †S OF APT ROSE (stage gate/time portal) APOSTROFE FAILURE INCURRED [means] GIRAFFE'S \* SOUL (Oannes and the Anu soul.) Uranites: those from Urania - heaven (in the quatrains where Lan and Lon minus apostrophe do not mean 'the year' nor 'one [person]' these words mean the On/Oannes and The An/Anu). \* "Giraffe" is the name of the Camelopardalis, the direction the Oannes come from.

† LIAR is referring to another "interpretor" of the quatrains, one who changed the spelling. See 6 100 regarding charlatans VII 20
