... said conclusion is that there is

1) no such thing as "coincidence" or even "accident" and
2) that the original work done by Allan Webber is valid in every way, since it was from his work that these particular lines derived. One more note: in the quatrains, years are quatrains

DELETE Doctor Says Channels Nostradamus, Mabus
Before the *True Original Quatrains* and other
"lost manuscripts" in 2013 - were provided to
the collator, the primary decoding of the non-original
quatrains was very cleverly done by Allan Webber
The original *Hidden Text of Nostradamus* web site
functioned jointly by the collator using Allan Webber's
programmed anagrams, supplied by Allan to the collator

It is only since the *True Original Quatrains* and other lost
manuscripts were found in 2013 by the collator, that the real
information intended for us in these times has been deciphered,
and this includes many names such as *Tellingier*.
This knowledge includes the 324 years - which has been
removed from our calendars and that the Elohim are in
Russia assisting Putin to restore Mother Earth.
Facta non verba is how we can discern the truth.

FOOTNOTE follows
The JAIN KEY

On the subject of more than one cipher key for numbers/dating – see the following lines from the hidden texts which explains how the Jain key was found, as well as saying there are plural keys. One really needs to simply cast one's mind over the almost impossible coincidence that anyone at all would find the code! The chances of prying eyes gaining the information in a given immediate time frame are practically nil. Nor even putting several people to the task. It requires *one* mind with a useful memory, it requires the Template and the knowledge of the "key" words. It was Alan Webber who accomplished part one of this. The word "Jain" as confirmation was well hidden just to top it off. To find all these lines *ad hoc* in documents with ten thousand lines and to recognise that any given one applied to any other given one was a task for years of work. Allan would have only had one key word to work from, "zero".

The rest were simply "curious" to me so they were "collected" for "later".

This is what the collator does, *collect and put together*.

Just to show you how these lines first arrived to be collated, one original example is here for you to see for yourself.
