

**1 Side Effects of Gadolinium**

NSF/NFD side effects caused by Gadolinium.

/24-7PressRelease/ - June 01, 2007 - Gadolinium is a contrast agent dye used in magnetic resonance imaging (MRI) and other magnetic resonance tests. A contrast agent is a dye, which is injected into your body to enhance the images from the test. Gadolinium's worst side effect is the development of a debilitating, and sometimes deadly, disease called NSF/NFD (nephrogenic systemic fibrosis or nephrogenic fibrosing dermopathy).

Potential side effects of NSF/NFD for all patients:

Gadolinium poses grave danger for people with kidney disease, but it can also cause side effects ranging from minor to severe in patients with optimum renal function. Side effects that anyone using gadolinium may experience include:

- Mild headache
- Low blood pressure
- Lightheadedness
- Nausea
- Pain or burning at injection site

Gadolinium injection can cause irritation to vein resulting in:

- Skin problems
- Blood clots

An allergic reaction to gadolinium can cause minor to dangerous symptoms including:

- Skin conditions
- Hives
- Rashes
- Itching
- Sweating
- Swelling of the face
- Itching eyes
- Shortness of breath

Pregnant and nursing mothers

Women who are pregnant should avoid the use of gadolinium when at all possible. Gadolinium is passed along by breast milk for about 33 hours after injection. Women who are breastfeeding should express their breasts and refrain from breastfeeding for at least 36 to 48 hours after receiving gadolinium.

Kidney disease

Gadolinium's worst "side effect" is NSF/NFD. So far it has only been confirmed to cause NSF/NFD in people with impaired renal function, but there have been anecdotal reports of people with no known kidney problems developing NSF/NFD after gadolinium use. Patient with any level of kidney disease or impaired renal function should avoid the contrast agent when at all possible.

NSF/NFD is a progressive disease that has no cure and no consistently effective treatment. It is painful, extremely debilitating, and sometimes deadly. Symptoms can develop within days of using gadolinium, but can take up to 18 months to appear.

If you experience the symptoms of NSF/NFD within two years after using gadolinium, you should get tested immediately. The best hope for people with NSF/NFD is early detection and attempting to halt or slow the progress of the disease. Symptoms include:

- Tightening and swelling of the skin, usually in the extremities, sometimes in the trunk of the body
- Thickening of the skin around the joints, restricting movement
- Red patches on the skin
- Skin which feels "woody" with texture similar to that of an orange peel
- Burning, itching, and/or sharp pains in affected areas
- Calcification of soft tissues
- Symmetrical skin lesions, commonly on the ankles and thighs and between the wrists and upper arms
- Muscle weakness
- Deep bone pain in the hips and ribs
- Yellow plaques near the eyes
- Fluctuating hypertension preceding the appearance of skin lesions

**2 CYRIL "ONE PHYSIS OR HYPOSTASIS [a 'standing under'] OF GOD THE INCARNATE"**

**3 QUINOLINE**

Chemical:	QUINOLINE	
<input type="checkbox"/> Health Hazard	Reference(s)	
Recognized:	<u>Skin or Sense Organ Toxicant</u>	
Suspected:	<u>Carcinogen</u>	<u>EPA-HEN SCDM</u>
	<u>Gastrointestinal or Liver Toxicant</u>	<u>RTECS</u>
	<u>Neurotoxicant</u>	<u>EPA-HEN</u>
	<u>Respiratory Toxicant</u>	<u>EPA-HEN</u>

**4 VALERIN**

n. 1. (Chem.) A salt of valeric acid with glycerin, occurring in butter, dolphin oil, etc., and forming an oily liquid with a slightly unpleasant odor.

## 5 GONYAULAX

Gonyaulax catanella

medical dictionary

A marine dinoflagellate protozoan that produces a powerful toxin that accumulates in the tissues of mussels and other filter-feeding shellfish and may cause fatal mussel poisoning in humans.

SOURCE OF RED TIDE Origin: G. Gony, knee, + aulakos, a furrow

## 6 PUXIS [from the Greek]

Greek and Roman Antiquity. a box of a usually cylindrical shape having a lid with a knob in the center. Gk pyxis a box for compass

## 7 GUA-NASE Function: noun

: an enzyme present in most animal tissues that hydrolyzes guanine to xanthine and ammonia

Central Biochemical Laboratory, Center for Allergology and Clinical Enzymology, Department of Biochemistry, Higher Medical Institute, Sofia, Bulgaria

Received: Abstract The guanase activity of the lung tissue and blood serum of guinea pigs is increased after anaphylactic shock.

## 8 DNA 'CATENATIONS' that link sister chromatids until the onset of anaphase are maintained by a checkpoint mechanism

## 9 Dan Burisch and Bill Hamilton 'Project Looking Glass' AT PROJECT CAMELOT.ORG

## 10. CHEMTRAILS

1. The operation is a joint project between the Pentagon and the pharmaceutical industry.
2. The Pentagon wishes to test biological diseases for war purposes on unsuspecting populations. It was stated that SARS is a failure as the expected rate of mortality was intended to be 80%.
3. The pharmaceutical industry is making trillions on medications designed to treat both fatal and non-fatal diseases given to populations.
4. The bacteria and viruses are freeze-dried and then placed on fine filaments for release.
5. The metals released along with the diseases heat up from the sun, creating a perfect environment for the bacteria and viruses to thrive in the air supply.
6. Most countries being sprayed are unaware of the activities and they have not consented to the activities. He states that commercial aircraft flying are one of the delivery systems.
7. Most of the "players" are old friends and business partners of the senior Bush.
8. The ultimate goal is the control of all populations through directed and accurate spraying of drugs, diseases, etc.
9. People who have tried to reveal the truth have been imprisoned and killed.

I'm a retired government scientist

This whole chemtrail issue is related to the plan for decreasing the world population to around 450-500 million

<http://www.conspiracyplanet.com/channel.cfm?channelid=42&contentid=206>

Each year the government has guessed which strains were most likely to spread. They seem to always guess right - don't they?

The purpose of the chemicals in the chemtrails is to help the viral envelope fuse with lung cells, permitting easier penetration and infection.

The anthrax spraying will probably come under the guise of a flu protection program to "save" those still alive after the epidemic

## Chemical and Biological Testing on Human Beings

Feb 19, 2003

(Speaking about Black Magic-Ed!)

### Chemical and Biological testing on Humans-Special Report

The Chemtrail Crisis - An Overview and Update

By Amy Worthington The Idaho Observer

#### The Chemtrail Crisis

Chemtrails over America - A Special Report

ONCE HEALTHY PLACES: In recent past years you were able to go to a natural area of high negative ionization such as forests, mountains, beaches, and waterfalls. These were considered healthy places. All of that has changed. The government and military aerosol (chemtrail) activity in the atmosphere, over our cities and world has damaged and negated the ability of natural resources to produce healthy negative ions as before. The total effect is a great increase in positive ions on and around your body and in your total living environment.

<http://www3.bc.sympatico.ca/Willthomas/chempics/chempics.htm>

Chemtrails - Barium, Aluminum, Titanium

#### Confirmed In Rainwater

From The Enterprise Mission

Michael Bara, Richard C. Hoagland

"In fact, the effect on Earth is becoming so pronounced that some elements of our own government appear to be engaged in a crash program to counteract the warming trend. A recently uncovered paper by the "Father of the H-Bomb," -- none other than Edward Teller himself -- has described the outline of this program in detail. In it, he specifically advocates the reduction of global temperatures by spreading particulates in the atmosphere from jet liners, exactly what we have been seeing in our skies ever since the publication of his paper in 1997. In fact, the whole program has taken on an air of desperation. The spraying is becoming increasingly obvious and open.

Even the day after the 9/11 attacks, when virtually everyone in the country knew that only military planes were allowed to fly, the spraying continued."

**Have You Been Looking At The Sky Lately?**

Have you noticed how it keeps threatening to rain, only for the skies to suddenly clear and if it rains, there isn't sufficient rain to fill our dams?

Have you noticed how some aeroplane trails don't disappear in seconds like they're supposed to?

Have you noticed how the trails spread slowly across the sky to form a thin wispy haze for hours?

Chemicals such as Nitrous Oxide, Aluminum Oxide and Barium at a level of 10 microns, in the forms of Mold, Bacteria, Pathogens within red-blood-cells in unusual fibres, Viruses and other biological agents are at play.

#### **Origin of the Name "Morgellons" Geographic Concentration of Morgellons**

Wikipedia: "The name Morgellons was coined in 2002 by Mary Leitao of McMurray, PA, while investigating her son's unexplained rash. She named the condition Morgellons (with a hard g), after a condition from the monograph, 'A Letter to a Friend' by Sir Thomas Browne, in 1690, wherein he describes several medical conditions in his experience, including that endemial distemper of children in Languedoc, called the Morgellons, wherein they critically break out with harsh hairs on their backs. Also, a 1935 paper by British doctor, C.E. Kellett, identifies the name 'Morgellons' with the Provençal term masclous, or 'little flies.' It is doubtful that the 17th century disease has anything to do with modern day Morgellons; however, the similarities were such that Mary Leitao elected to use the name as a consistent label when addressing politicians, physicians and health departments."

#### Mysterious, Unidentified Fibrils in Skin Lesions

"Brain Fog"

Chronic Fatigue

**Bizarre Morgellons Disease: A Nurse Describes Her Own Symptoms**

© 2006 by Linda Moulton Howe

**Mysterious and still-unidentified fibrils embedded in skin removed from facial lesion of three year old boy. Photomicrograph 60x courtesy Morgellons Research Foundation.**

**HOW ARE CHEMTRAILS AFFECTING THE BEES? NO MORE BEES, NO MORE POLLINATION, NO MORE PLANTS, NO MORE ANIMALS, NO MORE MAN."**

*"If the bees were to die off – mankind would have four years" Einstein*

## ABOUT CHEMTRAILS

1. Weather modification? 2. Mass depopulation? 3. Mass inoculation?
2. Dormant virus which will activate on mass vaccination
3. Chemtrails, as opposed to contrails, take three or more hours to dissipate.
4. Regular contrails disappear in about 20 minutes.
5. Chemtrails tend to look flat, not spread out
6. Another feature different from ordinary contrails is that mature chemtrails display a vertical curtain of fall-off. [Described as "flounces" by Nostradamus.]
7. Intense chemtrail spraying is done in tic-tac-toe, "X" and grids patterns.
8. Spraying is generally done by the following planes: KC-10A, KC-135 (707) and C-130 for the high altitude spraying, and C-130 turboprop aircraft for the low-level spraying.

Low level spraying contains moulds and fungi and produces varying symptoms including: \* headaches worse than migraines \* heartburn \* heart conditions \* heart arrest, on the rare occasion \* flu-like symptoms \* extreme fatigue \* diarrhoea \* pain and swelling of muscles and joints \* dizziness \* nausea \* stiff neck \* nagging sore throat \* general malaise

After spraying, gelatinous material is seen from low-flying, multi-engine aircraft. Cobweb-like material from higher-altitude spraying has been analysed in university government-licensed labs with some of the pathogens identified.

## WHAT IS IN CHEMTRAILS?

### THORIUM see 2 100 1

Part of the substances in the chemtrails have been identified: a cocktail of JP8+100 jet fuel, laced with Ethylene Dibromide (EDB).

This chemical pesticide was banned in 1983 by the EPA as a definite carcinogen and chemical toxin. Exposure to this type spraying can include these symptoms: \* respiratory tract problems \* severe infections to the throat and sinuses \* swelling of the lymph glands \* coughing fits \* shortness of breath \* sinus headaches \* general respiratory failure \* damage to the heart and liver \* exposure to EDB makes people more susceptible to other biological agents due to severe lung irritation

For lack of a better term, "brown goo" has been used to describe the material found on exterior walls of buildings and windshields of automobiles. It's almost impossible to remove with soap and water, and has proved to be highly toxic to anyone coming in contact with it. Don't touch it, handle it, or attempt to move it by yourself.

"Numerous red and white blood cells, and unidentified cell types have been found within the sub-micron fibre sample previously presented and submitted on Jan. 20, 2000 to Carol M. Browner, Administrator of the United States Environmental Protection Agency. The cells appear to be of a freeze-dried or desiccated nature in their original form within the microscopic fibres." <http://www.carnicom.com/bio1.htm>

1. A unique chemical marker used to identify the specific biological cocktail.

This marker is derived from a coral reef found in an ocean on the other side of the world.

2. Samples contain a bacterium, Pseudomonas Fluorescins, which is responsible for serious blood infections. Mr. Thomas characterizes this organism as a bacterium that his research has shown to be named in more than 160 Pentagon patents pertaining to both biological warfare applications and aerosol inoculation experiments. It is also cited in DOD literature as an experimental biowarfare bacteria. Additionally, Pseudomonas Fluorescins is known to attack the respiratory system and is associated with severe coughing fits, general weakness, and vertigo and is extremely resistant to most antibiotics.

3. Some samples contained Pseudomonas Aeruginosa which invade and attack the respiratory system. Once infected by this bacteria, the linings of the lungs produce a thick mucous which results in breathing difficulties, coughing fits, and shortness of breath, following only minor physical exertion. After the infections have taken hold, Aeruginosa generates a wide range of toxic proteins which cause extensive tissue damage and severely compromises the immune system. It is also associated with bronchitis, pneumonia, ear and eye infections, meningitis, muscle and joint pain, cystic fibrosis, and gastrointestinal distress. Aeruginosa is also very antibiotic-resistant.

4. A fungus called Streptomyces has also turned up in these cocktails. This fungus is normally found inside a research laboratory since its primary use is in the production of antibiotics like Tetracycline and Streptomycin. The non-lab form of this fungus can cause severe infections in human beings.

5. The last component discovered in these cocktails is a special bacillus which contained what is known as a DNA restriction enzyme. What this allows, in effect, is gene splicing. A scientist can take a specific length from a DNA chain and transfer it to another organism creating a mutation. This substance is found only in genetic engineering laboratories.

The technology exists for a type of DNA vaccine.

One of its uses is to create exotic viruses with specific characteristics and pathologies.

6. Build up your immune system.

Eliminate fatty foods, refined sugar, white flour, salt, coffee, alcohol, tobacco and recreational drugs. Drink plenty of pure water.

Take supplements of vitamins A, C, E and zinc. Echinacea and Goldenseal have also proved helpful. Some folks suggest daily doses of colloidal silver as well as gargling with it. Don't burn your candle at both ends; get plenty of sleep. Olive Leaf Extract and carotenes, plenty of anti-oxidants, such as Prunes and rosehip and organic carrots.

If it is indeed a case of mass inoculation, then you might ask why the government doesn't just come out with their spraying plans.

Here are some possible explanations.

1. Liability. People have died as a result of these sprayings.
2. It formally tells potential terrorist attackers we're preparing for a specific disease and they might alter their plans to use a different pathogen.
3. Avoid mass panic.
4. Avoid lawsuits over huge civil rights infringements. Whoever agreed to be sprayed?

## AIR TRAFFIC CONTROLLERS CONCERNED OVER CHEMTRAILS

by William Thomas

Vancouver, Canada Mar. 5, 2002...As continuing chemtrail activity culminated in massive aerial spraying over Vancouver Island and Washington state yesterday- and broadening plumes once again fanned out to haze clear blue skies - Air Traffic Controllers at major airports across the United States expressed concern over the emissions constantly showing up on their radar screens.

"Chemtrails" is the term widely used to describe the brilliant white 'trails laid down by U.S. Air Force tanker planes photo-identified over North America and a dozen other allied nations in a process the U.S. Air Force calls "aerial obscuration".

Chemtrails are real.

After a five-year investigation into chemtrails - including interviews with air traffic controllers (thanks to reporter ST Brendt), scientists actually involved in this project (thanks to reporter Bob Fittrakis), NASA and NOAA atmospheric studies, and corroboration from independent scientific lab tests on rain and snow samples falling through chemtrails (thanks to my Espanola correspondent, and Dave Dickie in Edmonton), I can state emphatically that chemtrails are not contrails.

So what exactly are chemtrails? And what evidence is offered by the award-winning reporter who first broke this story?

Welsbach Seeding Patent for Global Warming PDF

For Chemtrail answers you can trust [www.willthomas.net/Chemtrails](http://www.willthomas.net/Chemtrails)

"The scientist claims that the two most common substances being sprayed into chemtrails are aluminum oxide and barium stearate. When you see planes flying back and forth marking parallel lines, X-patterns and grids in a clear sky, that's aluminum oxide, according to the scientist. The goal (says the government) is to create an artificial sunscreen to reflect solar radiation back into space to alleviate global warming.

In some cases, barium may be sprayed in a similar manner for the purpose of "high-tech 3-D radar imaging."

(Columbus Alive Dec. 6, 2001)

[Barium reduces fertility and libido]

In Espanola, lab tests of rainwater falling through extensive chemtrail plumes revealed levels of aluminum seven-times higher than existing provincial safety limits for drinking water. Other spray simply fell as visible, flesh-stinging particles, thick as snow.

Microscopic quartz particles predominated in the Espanola chemtrails analysis, with one chemtrails fallout sample taken from a car windshield showing an 80% quartz component. The electrical conductivity of quartz – especially its use by Nikola Tesla in his high-energy experiments - has raised speculation that the spraying over Espanola may have been connected with HAARP – and/or airborne laser experiments using a Boeing 747 as a weapons platform. An amateur radio operator has detected high levels of electrical energy over Espanola during heavy chemtrail spraying. On one occasion the Prime Minister's aircraft was forced to make an emergency landing due to "electrical problems" while flying through the area.

## BARIUM FOUND IN CHEMTRAILS OVER ITALY, CANADA, USA

In Edmonton, Alberta last winter - after city landscape contractor Dave Dickie found electrical conductivity in city soils as much as 4.6 – 7-times higher than normal and acceptable levels - tests conducted by Nor-West Labs on snow samples collected from extensive chemtrails found levels of aluminum oxide and barium in northeast Edmonton at more than twice the levels recorded at a heavily polluted diamond mine. Though barium is twice as reflectant as glass – and thus serves well as a sunlight reflector called for in the late Dr. Edward Teller's "sunscreen" scheme – this common electrolyte is also an excellent conductor of electricity.

Vincent says that his group is currently raising money for more extensive – and expensive - tests on chemtrail fallout. But after collecting "white material" from the chemclouds, the Italians have already found "barium salts" in the mix.

While many barium salts are relatively "safe", other barium compounds have been used as rat poison. Though the filmmakers did not know the type of barium identified in Italian chemtrails, we all wondered just who are the lab rats in this ongoing secret experiment?

Vincent reported widespread health effects following chemtrail spraying – including sudden nosebleeds suffered by his mother, sister and father in Florence after "many trails" there 18 months ago. JP-8 - the sweet-smelling intoxicant connected with jet flight - is actually quite nasty.

Since Desert Storm felled so many tanker crews, sparking a pilots' exodus from the Air National Guard that currently continues, the US Air Force has spent more than \$25 million studying the poisoning of ground crews and other personnel exposed to jet fuel fumes.

15 July 2009 - update

• A photo of chemtrails being sprayed by a circular, unknown, 'black' aircraft (Colorado, 2008): This is one of the most interesting images I've ever seen. I mentioned this in my Zurich conference workshop, and promised the participants I would post it.

**SEE 2 44 1 HIV**

<sup>11</sup> **HIV - the protein coat is on the virus itself.** And \* *The recycle time of the gravity amplifier is 10 milliseconds.*

Now, HIV - have we talked about HIV?

Kerry Cassidy – Project Camelot.org: “No, but we can definitely go there”.

J: *AIDS was invented by a Navy surgeon named R. M. Donner.*

And when Bob read the briefing up at S-4, one of the things that impressed him is that in the paper... All the briefings he read were, you know, 50 to 100 pages, with a blue cover. And they were scattered on this table. And he could take each one. And what it was, was that as he progressed his clearance, these briefings – [lifts top portion of a stack of papers] - Say this is one briefing. It would be stapled here. And as his clearance progressed, you know, they would un-staple a few more pages.

But anyway, on the briefing of AIDS... and I have it; it’s probably in here, because I wrote a whole thing on what he told us. It was developed, you know, to get rid of a certain segment of... number of humans.

But it was developed by R. M. Donner. And they have the exact cure for AIDS.

And it has to do with the cucumber *Trichosanthes kirilowii*, which is only grown in China.

We tried to get it out of China, on three attempts. But - however they know, somebody knows - and each one had been cooked, either by a microwave or something as it passed through customs. So it’s impossible to get it out. But I’ll read you the exact cure and how it works.

K: Well, we have a contact right now who says he worked on that - on engineering the AIDS virus - in Africa.

J: Possible. But it wasn’t in Africa. It was here. It was *released* in Africa. But it was built up at S-4.

*AIDS was a virus that is protected by the protein coat on the RNA preventing the antibodies, the T-4 cells, of the immune system from detecting and eliminating it.*

*The alleged cure for AIDS lies in the excrement of the white fungus that’s grown from the Chinese cucumber *Trichosanthes kirilowii*.*

*This excrement, which develops after about two or three weeks, is separated with hydrazine sulphate in an acidification process which dissolves the protein coat on the RNA and exposes the nucleus of the virus that’s detected by the antibodies in the immune system.*

*Regardless of how weak the immune system is, the virus will be destroyed. No more than 20cc dose per 36-hour period should be administered.*

*No antibiotics should be used during this period.*

*The 20ccs are metabolized in 36 hours, having dissolved the protein coat on the virus.*

*And I mention here that over the last 20 years I have been party to several attempts to get samples of the *Trichosanthes kirilowii* out of China, but all have met with failure, the last samples arrived having been cooked during departure procedures.*

## 12 RADON in many Lines

Radon Fact Sheet

The U.S. Environmental Protection Agency (US EPA) and the [Surgeon General's Office](#) have estimated that as many as 20,000 lung cancer deaths are caused each year by radon. There are no "safe" levels of radon gas.

What is radon?

A layman's description

Radon is a cancer-causing [radioactive](#) gas. You cannot see, smell or taste radon, but it may be a problem in your home. It easily penetrates many common materials like paper, leather, low density plastic (like plastic bags, etc.) most paints, and building materials like gypsum board (sheetrock), concrete block, mortar, sheathing paper (tarpaper), wood paneling, and most insulations.

Radon is also fairly soluble in water and organic solvents. A Radioactive gas and comes from the natural breakdown (radioactive decay) of uranium. It is usually found in igneous rock and soil, but in some cases, well water may also be a source of radon.

## 13 HAARP see 6 25 1

According to University of Ottawa Professor Michael Chossudovsky, the military's [High-frequency Active Auroral Research Program](#) (HAARP), operating in Alaska as part of the Strategic Defense Initiative, is a powerful tool for weather and climate modification.<sup>61</sup> Operated jointly by the U.S. Navy and Air Force, HAARP antennas bombard and heat the ionosphere, causing electromagnetic frequencies to bounce back to earth, penetrating everything living and dead.

HAARP transmissions make holes in the ozone, creating yet another hobgoblin. HAARP inventor Bernard Eastlund described in his original patent how antenna energy can interact with plumes of atmospheric particles, used as a lens or focusing device, to modify weather

**HAARP is capable of triggering floods, droughts and hurricanes, much to the chagrin of both the European Parliament and the Russian Duma.**

### CHEMTRAILS & VACCINES

"...an aerosoled precursor has been put into the air and almost everyone has breathed it into their lungs.

The biochemist states that the vaccines to be administered in the Fall (Autumn) will be ACTIVATED when the constituents come in contact with the aerosoled precursor in the body and will cause a rapid spread of the H1N1 Influenza A virus.

**This biochemist is very upset about the matter, to say the least, and is a very reliable source that needs our utmost protection."**

### UFOs and 14th Century Black Death

© 2008 by Linda Moulton Howe

*"People were reporting 'comets.' But they were clearly **not** comets from the descriptions.*

*People were reporting bright flying objects and said:*

***the aerial objects were spraying gas,***

*which they called 'mists' that caused the Black Death."* - William Bramley, Atty., *The Gods of Eden*

The classic sign of the 14th Century bubonic plague was the appearance of buboes shown in illustration, which are swollen lymph nodes in the groin, the neck and armpits that oozed pus and bled.

Most victims died within four to seven days after infection.

[Illustration of the Black Death from the Toggenburg Bible in 1411.](#)

Chemtrails: Suppression of Human Evolution

<sup>14</sup> **BEWARE OF THAT CLING WRAP.** Consumer group Choice suggests we start avoiding plastic packaging for fear it could be potentially hazardous.

Of concern are materials containing polycarbonate - used to make food storage containers and bottles - and epoxy resins, used to line tin cans, Choice said.

Both have the potential to release *bisphenol A*, which has been linked to increased risk of heart disease and diabetes.

Choice has called on the industry to phase out the use of such materials, and until then, introduce mandatory labelling.

"PVC is used to make the gaskets that seal glass jars used for foods such as pasta sauces," Choice spokesman Christopher Zinn said.

"There are safer alternatives, which should be used instead.

"There is vigorous debate about the various risks. Choice believes the evidence, while far from conclusive, can no longer be ignored."

Many retailers still use PVC cling wrap to package meat and other produce, Choice said.

Concerned consumers should avoid food packaging and baby products with the voluntary identification code three (for PVC) and seven (a catch-all category that includes polycarbonate and plastics that can't be easily identified).

The consumer advocate is meanwhile hoping to lobby the federal government to make some changes.

Anyone wishing to contribute can send rinsed examples of plastic food packaging they are concerned about, along with baby products, to Choice's Sydney office, which will be forwarded to Health Minister Nicola Roxon.

For more information, visit [www.choice.com.au/plastics](http://www.choice.com.au/plastics).

## <sup>15</sup> THE CROTON PLANT

18-Mar-2004

Oil from the seeds of an Asian plant, already shown to fight leukemia, also appears to kill prostate cancer cells and shrink tumors, signs of strong potential in the fight against the second cause of cancer death among European men.

But the seed oil also contains the active ingredient 12-O-tetradecanoylphorbol-13-acetate, a compound generally known as TPA.

"We demonstrated that TPA could simultaneously stop the growth of new prostate cancer cells, kill existing cancer cells and ultimately shrink prostate tumors," said Allan Conney, professor of Cancer and Leukemia Research at Rutgers University in the US.

**VACCINES AND HEAVY METALS COLLECTION**  
*Sandi Radomski*

---

**VACCINES:**

1. MMR/MMR2 VACCINE
2. MEASLES VACCINE
3. DPT VACCINE
4. DIPHTHERIA VACCINE
5. PERTUSSIS VACCINE
6. TETANUS VACCINE
7. HEPATITIS VACCINE
8. SMALL POX VACCINE
9. POLIO VACCINE
10. CHICKEN POX VACCINE
11. THIMEROSAL (MERCURY PRESERVATIVE)
12. CAT VACCINE
13. DOG VACCINE
14. FLU VACCINE 1999
15. FLU VACCINE 2000

**HEAVY METALS:**

1. ALUMINUM
2. ARSENIC
3. ASBESTOS/SILICON
4. BARIUM/BERYLLIUM
5. CADMIUM
6. COPPER
7. GOLD
8. LEAD
9. MERCURY
10. NICKEL
11. SILVER/SILVER AMALGAM
12. TIN
13. TITANIUM
14. VANADIUM
15. ZINC
