Ea – Enki – E.Yah began as an Anakim/Oannes. He is a green Oannes and now a Ra say these texts. Enki gave the 10 Commandments to Moses and the key clue is in the number TEN – the number favoured by the Elohim. The Anakim favour the number 12, yet on occasions the Elohim do use 12, such as the 12 Centuries of these texts. Albeit the final two were SIXAINES and not QUATRAINS. There is talk that Enki spent time as Da Vinci. Even though the full name LEONARDO DA VINCI appears in these texts, nowhere has it hinted that Da Vinci was an incarnation of Enki –

the part proof is that Da Vinci DID accommodate war engines. I say 'part' proof because there are two details pointing to Da Vinci's abhorrence of war – first that he engineered the 'turtle' with the second set of wheels moving against the first set so that it would never work, and second that he never encoded these engineering diagrams as a secret, which he did with all his other valuable inventions. Meaning that he had provided what is called 'planned obsolescence' in those diagrams.

PREGNANT ANGEL (black halo) **HIDING A TAIL IN DARK PLACES** (outer space)
EMPIRE (black mitre, red cassock) of **FOUR STARS PLUS THREE = SEVEN = Ursa Major**

From the Eddur/Aettir/Aesir

THE ELDER EDDA OF SAEMUND

“to try ; and I can step from the port^{portal} to land. Thou shalt be soundly cudged, if I heartily begin, and let thy tail fall^{off}, Hrimgerd!

Valkyria.

9. A ring is on the hilt, courage in the midst, in the point terror for his use who owns it: ^{the ring -stargate}
 along the edge a blood-stained serpent lies, and on guard the serpent *casts its tail*.

Skadi.

49. Thou art merry, Loki ! Not long wilt thou frisk with an **unbound tail**; for thee, on a rock's point, with the entrails of thy **ice-cold son**, the gods will bind.

OF LOKI AND HIS PROGENY.

34. "There is another deity," continued Har, "reckoned* in the number of the **Æsir**, whom some call the *caluminator* of the gods, the contriver of all fraud and mischief, and the *disgrace* of gods and men. His name is Loki or Loptur. He is the son of the giant Farbauti. ^{He is a Nephilim}

His mother is Laufey or Nal; his brothers are Byleist and Helblindi. Loki is handsome and well made, but of a very fickle mood, and most evil disposition. He surpasses all beings in those arts called Cunning and Perfidy. Many a time has he exposed the gods to very great perils, and often extricated them again by his artifices. His wife is called Siguna, and their son Nari.

*Reckoned: THOUGHT TO BE a member of the AESIR-AETTIR-EDDUR ^{Elohim}

THE YOUNGER EDDAS OF STURLESON

35. "Loki," continued Har, "has likewise had three children by Angurbodi, a giantess ^{Anu Nephilim} of Jotunheim. The first is the wolf Fenrir ^{Lupus} ; the second Jormungand, the Mid-gard serpent; the third Hela* (Death).

The gods were not long ignorant that these monsters continued to be **bred up** in Jotunheim, and, having had recourse to divination-, became aware of all the evils they would have to suffer from them; their being sprung from such a mother was a bad presage, and from such a sire was still worse.

All-Father therefore deemed it advisable to send one of the gods to bring them- to him. When they came he threw the serpent into that deep ocean by which the earth is engirdled.

But the monster has grown to such an enormous size that, holding his tail in his mouth, he encircles the whole earth. Hela he cast into **Nifelheim**, and gave her power over nine worlds.

* Hela: interesting that more modern medicine has titled the cancer cell as "Hela"
