

In this Leonardo forum, while working on it, I did see the names which mean the collator (me) – but in my hurry to get the other warnings in those lines, I put the collator dialogue on the back burner. I see now that this was not a coincidence. Then during the week of February 4th 2015, I had a minor heart attack which took me off to the local G.P

Suddenly while in that place I recalled that one of the words in one of the lines I ignored was “EARTH” which is also “HEART”. To complete this anecdote, I need to relate what transpired between this Doctor and a male nurse and me. They had told me that I would not be going home the next day since I was going to be sent to Orange hospital for an angiogram and an operation.

All night I stewed on this information and by morning had made up my mind something did not feel ‘right’. Then when they came in the morning to prepare me for the hospital and its angiogram I stated bluntly and emphatically that that operation and angiogram were not going to happen! The male nurse then brought me a form to sign which at a quick glance I could see the words “*thoracic catheterization*”! Did they think to fool me with long words?

Why were they being so devious?

Was there some conflict between their desire to send me off and earn them some money (them or the drug companies) and my desire to treat myself?

My firm argument to them (*that I have lived the life I wanted, done the things I aimed at and learned most of the mysteries which had bugged me as a young person, and that by extending my life was only extending the discomfort to my family...*) won.

Immediately, or as soon as I felt up to facing the computer – I went straight to retrieve those lines with the word “EARTH” in them and here is the result:

<http://healthimpactnews.com/2014/flu-vaccine-is-the-most-dangerous-vaccine-in-the-united-states-based-on-settled-cases-for-injuries/>

The last report issued in 2013 by the Department of Justice (Vaccine Court), for compensation made by the Health and Human Services for people injured or killed by vaccines, was released in December 2013, covering the period of 8/16/2013 through 11/15/2013. The report is available as a [Power Point presentation here](#).

There were 139 claims settled during this time period, with 70 of them being compensated. So, just over 50% of the claims filed for vaccine damages were compensated during this period.

Once again, the greatest percentage of damages compensated were for the influenza vaccine, and most of those were for Guillain-Barré Syndrome (GBS). Yet these facts, tucked away in a file on the Department of Health and Human Services website, are never reported in the mainstream media. So we will report them here. You can also read the report yourself in the [Power Point file here](#).

Of the 70 cases compensated, 42 of them were for the flu vaccine, or 60% of the cases settled where compensation was awarded for injury or death due to the vaccine. The combined total of the other 40% of cases settled included the following vaccines: Hep B, Tetanus, HPV, DTaP, MMR, IPV, PCV, Hib, Meningococcal, Varicella, TD. So injuries and deaths due to the flu vaccine were compensated more than the total compensation paid out to eleven other vaccines. Yet, if you look at the top selling vaccines in the market, the top flu vaccine is only #5, being outsold by Prevnar, Gardasil, PENTAct-HIB, and Infanrix/Pediarix. (Source.)
