

## HIDDEN TEXTS OF NOSTRADAMUS

4 83 4 Serre de chaines. apres d'un rude cable

INNOVATION: USES DEVIATION IN EDITIONS

(yes, this is the first of them)

### THE REAL AGE OF THE GIZA FLOORPLAN

It seems to me that the timing has arrived for the public to comprehend the actualities. Every time I see or hear so called “experts” sprout the age of the Giza pyramids being “fourth dynasty” it makes me cringe for their lack of personal involvement. By that I mean that they are enslaved to an archaeological community lacking their own individual detective abilities.

In other words “followers” in the blind sense.

As G.R.R. Martin put it “belief defies reason”.

How brave was Dr Robert Schock placing the age of the Sphinx at a number of millennia which almost gave his colleagues the vapours!

That number sits just ‘below’ the Younger Dryas, and the Greatest Flood attributed to a man of many names, the one we know as Noah, whose “ark” was a floating laboratory with only enough livestock aboard to feed the family for the duration of the flood\* <sup>footnotes</sup>.

How can I announce such things without evidence?

The answer is easy, the evidence is there for those asking the right questions.

The first of which being:

#### 1: ESTABLISHING THE VERACITY OF ZECHARIAH

##### SITCHIN'S WORK ON ENKI'S CLAY TABLETS

Why couldn't Ala.Lu and Ea simply fly OVER the ‘Hammered Bracelet’? This question arose because when Z. Sitchin did translate the Clay Tablets of Enki, he did not even ask that question, and he did not because no one has queried the real state of our “solar system”. Our solar system travels in a vortex fashion<sup>1</sup> with all the planets acting as followers of our sun, hence the asteroid ‘belt’ a.k.a the Hammered Bracelet is all encompassing, something akin to a Faraday cage.

This little detail is the reason both Ala.Lu and Ea had to blast their way into our solar system and could not simply ‘fly over’ the barrier. Zitchin being a man of the establishment comprehended only what that establishment understood at the time. I hear you say 'so what!' This alone tells us that the Clay Tablets of Enki do hold up to scrutiny. Taking us all to Clay Tablet number ten, which tells us what caused Noah's flood, and the date, being “Leo Rising” – the most important point of all.

#### 2: THE PRECESSION OF THE AGES – WE STILL HAVE CENTURIES BEFORE THE AGE OF AQUARIUS

The “Ages” as we have all been ‘taught’ via our wobbly and legless internet, are all wrong<sup>2</sup>. On one hand we as the public are told each ‘age’ through which we all travel is a length of either 2,000 years or 2,160 years. Whichever non-student one reads. First we need to establish what a ‘year’ is – until recently it was 365 days, and that was only since 705BC when the Chinese noted the 360 day year had become longer. Enlarged by the five ‘unlucky’ days of the Maya. Since October 2013 we have a 377 <sup>footnotes</sup> day year – rather convenient, just an extra day per month, but that is another dissertation since it includes the problem of the changing climates. The ‘ages’ are formed by the length of years it takes our sun to transverse the distance across the face of an astronomical constellation – in this instance the twelve constellations deemed the zoö-diacs. There are two constellations which are greatly larger than the other ten, they are Leo and Pisces, and there is one which is half the size of Leo and that is Aries, being only 1,440 years for its solar crossing. In all they take just on 25,920 years to complete the full cycle of the ‘mill-wheel of precessional ages’.

Pisces commenced around 5B.C [C.E.] Pisces’ length is app. 36 degrees giving us all the horrifying aspect that Pisces contains 2,592 years with some centuries yet to go before we see Aquarius. The main point of establishing the correct “ages” is to arrive at the Age of Leo Rising. Leo is 2,808 years, which is 39 degrees by 72 years of each degree of crossing. Leo commenced ca 10,373 years B.C ending ca 7,565 years B.C at the age of Cancer. Thus the age of Leo ‘rising’ is correct for Clay Tablet Ten. “Rising” being ‘on its way to the meridian’ a distance of around 1400 years. The meridian being reached at 8,973 B.C. We will come to the date of ca 9,500 B.C. (which sits comfortably in this time frame) – via the astronomical clock discovered on the ceiling of the ‘air shaft’ at what has become known as “Gantenbrink's door” in the Great pyramid. The Lion-headed sphinx was constructed not only to hide what it does hide, but to announce Leo Rising.

The original features of the lion were transformed by HatShepSut, whose face it is now – (another subject.)

### 3: HERODOTUS TOLD US IN NO UNCERTAIN TERMS:

"Cheops became king over them and brought them to every kind of evil: for he shut up all the temples, and having first kept them from sacrifices there, he then bade all the Egyptians work for him. So some were appointed to draw stones from the stone-quarries in the Arabian mountains to the Nile, and others he ordered to receive the stones after they had been carried over the river in boats, and to draw them to those which are called the Libyan mountains; and they worked by a hundred thousand men at a time, for each three months continually. Of this oppression there passed ten years while the [causeways](#) were made by which they drew the stones, which [causeways](#) they built, and it is a work not inferior, as it appears to me, than the <sup>[work of the]</sup> pyramid itself; for the length of it <sup>causeway</sup> is five furlongs and the breadth ten fathoms and the height, where it is highest, eight fathoms, and it is made of stone smoothed and with figures carved upon it. For this they said, the ten years were spent, and for the underground he caused to be made as sepulchral chambers for himself in an island, having conducted thither a channel from the Nile  
*Herodotus: Book Two #124*

- o sepulchral chambers:- tomb
- o ten years spent on building the causeways, not the Pyramid, because the waters had receded

Clearly stating that the pyramid at lake Moeris (Al Faiyoum) was already built, and therefore not built by Khufu/Cheops! To paraphrase Da Vinci – people have not been “seeing what they are looking at”. Or seeing what they are NOT looking at in some cases, those things which are omissions say as much as those things we do see. There are many ‘sources’ over history which point to the age of the Giza pyramids being some where between 2,500 BC up to 3,000 B.C. Yet not one of them mentions the fourth pyramid, the black one. As an omission this points to the information received by these ‘historians’<sup>4</sup> as incomplete and possibly all of it misleading, intentionally.

There is a truly good reason for prevaricating real history and it is the subject of the word “treasure” – indeed the greatest ever named. This may well be the reason Herodotus does continue with other ersatz ‘builders’ of the other two pyramids, little of which can be correct, partly because he does not mention the fourth pyramid and partly according to a detail on the “inventory stele” †

### 4: GANTENBRINK’S CEILING

“The etching of a starmap centred exactly above Gantenbrink’s Door, in the ‘airshaft’ running up and away south from the Queen’s Chamber in the [great pyramid](#), depicts some amazing surprises for us all, if we would only do the research. No hieroglyphs here at all; **just celestial markings**.

These markings were NOT purposeless graffiti; because if purposeless graffiti were allowed, then markings would have been found all over the pyramid, and they were not. All facets of the pyramid were aligned to a Northmark – INCLUDING the shaft pointing south – to align that shaft to something different than the [true north](#) sky (what everything else was aligned to) would have caused failure in the engineering.”

*Djedi leader Shaun Whitehead*

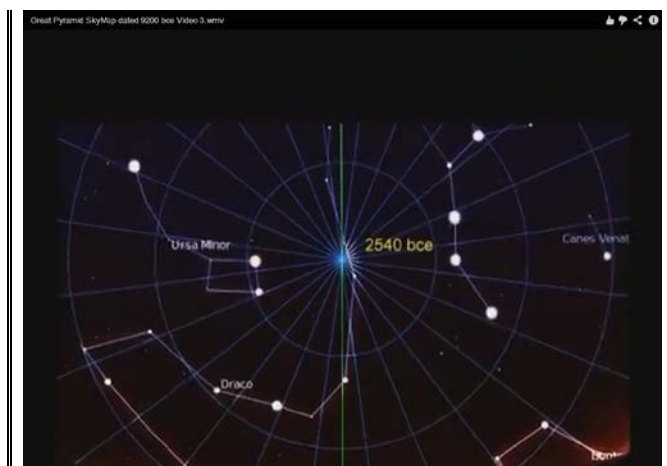

AUGUST 2012

“Scoutek UK had already begun exploring behind the gates earlier this year - and produced the first-ever images from behind the gates using a 'micro snake' robot. But the exploration was halted by the recent unrest in Egypt.”  
Great Pyramid Expedition Djedi leader Shaun Whitehead

See the celestial clock engraved on the ceiling? An impossibility to engineer *after* the ‘air shaft’ was made.

starmap at 9,200 BC / 9,500 BC the true date the same on the ceiling of the ‘air shaft’

starmap at 2,540 BC the position of stars at the supposed Giza construction date

compare this to the astronomical "clocks"  
It matches the 9,200BC [9,500 BC] lineup <sup>4</sup>

5: THREE HUNDRED AND TWENTY FOUR YEARS

"ADDED" TO OUR CALENDAR – WE ARE IN 1691: <sup>5</sup>

Once again this topic is going to be difficult for people to absorb and is the very reason Archaeologists are forever scratching their collective heads when it comes to dating anything at all. The reasoning is simple. In the year 2,000 [AD] all of our computer systems were assiduously 'fixed' to the one date. This includes astronomical 'clocks' of the heavens. Whatever the motivation really was for prince Ottö in the July of 676AD to call August 676AD the year 1,000A.D. we will never really know. The edict was made in Constantinople, prince Ottö being related to the Emperor. The 'Dark Ages' were really dark simply because they had never been.

By the way, this also assists us in understanding the Shroud of Turin to be kosher too. If pope Gregory had really been in 1582, he should have removed thirteen days, not just ten.

6: BENNU BIRD LAYOUT AND PYRE-AMID FOUR, THE PROBLEM BEING:

There was a FOURTH pyramid at Giza, called the black pyramid by Frederic Norden in 1770.

The third small pyramid is not a perfect constellation fit to Orion's Belt, so those who aspire after this theory put that little detail down to "astronomical movement". There are those who now say this is set on the Cygnus layout, with Deneb the tail being Andrew Collins' discovery at the Caves of the Bennu Bird. Problem with that, the Bennu bird is a Heron/Crane/Ibis/Stork - long legs and long neck. Not a Cygnus/swan/Goose Returning (a much later icon of the time of Psunenes) The only other 'fit' is Grus - the Heron in the Southern hemisphere (these days) with its long sharp beak at Oxyrhynchus, which was once at the shore of Lake Faiyum/Moeris. This configuration goes back to the time of Leo Rising and does fit all the rest of the layout. More interesting is the obsolete name for the "beak" aka "the beak in the fish" and Grus DOES have its beak in the tail of Pisces constellation. Cygnus has a beak, Bireo, which is attached to a long neck, but not as far as Oxyrhynchus, and in quite the opposite direction.

a) Lake Faiyum means "the sea" and that area of the southern skies was also called "the Sea" - where all the nautical named constellations reside. Moeris/Faiyum WAS an inland sea of fresh water lapping at the Giza Plateau and when it began to recede, Khufu was forced to build canals to reach the water... plus Herodotus stated that this pharaoh's SEPULCHRE (tomb) "was buried under a nearby island". Khufu only built the canals.

Begging the question - why does a pyre-amid need water?

b) In the Clay Tablet #10 of Enki – the statement is made that the entire Giza Plateau was designed in "LEO RISING" which was around 9,500BC. Inside the Great Pyramid has been found an astronomical clock dated 9,200BC, dated by modern computers which are 324 years out. Prince Ottö in 675AD caused July 676AD

to be named 1000 A.D, so we "lost" 324 years. This became an edict in Constantinople. All our computers have been set with this error at the year 2K debacle, so add back 324 years to 9,200 BC and we have ca 9,500BC – Leo Rising, which is what the Sphinx is, a manticore<sup>6</sup>. The Egyptian year ended in Leo and commenced in Virgo, hence the FEMALE head on the current sphinx which is HatShepSut.

[author noting: she was mother of Amenhotep II, son of ThutMose III and the grand father of Amenhotep IV a.k.a. AkhenAten]

c) Of some interest is the date Edgar Cayce gave for the building of the Giza Pyramid structures. Asked in 1932, his answer was this:

(Q) What was the date of the actual beginning and ending of the construction of the Great Pyramid?

(A) Was one hundred years in construction. Begun and completed in the period of Araaraart's time, with Hermes and Ra. [author's note: Ra is a titled which is meant to be earned]

(Q) What was the date B.C. of that period?

(A) **10,490 to 10,390**

5748-6 Reading given by Edgar Cayce July 1, 1932.

Edgar Cayce's informant also said we would have a pole shift in 1999.

Interesting to note that Ninghizzida in the Clay Tablets of Enki was also known as Hermes/Thoth, and was stated to have designed the Giza Plateaux after the Great Flood. We also need to keep in mind that our year may well have been one of 260 [Mayan] days at this time.

We now know that sonic frequency – magnetic resonance tools were used for the levitation and the engraving and cutting of stones, a detail we learn from Michael Tellinger (his 'sasar' energy) and Ed LeedsKalnin with his Coral Castle...

7: "ASSIGNED TO EGYPT TO STUDY HISTORY"

It is certainly not understood by the public in general that Nostradamus, like many of his day, went to the Middle East and studied for numerous years receiving information 'from the horse's mouth', even telling us so in one of the quatrains here...

Centuries 1 quatrain 40 line 3 (Nostradamus)  
 'One whose assignment required history of Egypt'

The word 'treasure' named throughout all of the (12) twelve Centuries <sup>7</sup> written down by Nostradamus is the self same greatest treasure of all mankind...

... a means for the control of time.

Also described by Nostradamus is the "docking bell" under Memphis-Giza:

1 29 HORRIFYING CREATURE: AGGREGATING APART ~ MATERIALISING IN ALIENATING DOCKING BELL ~ EBONICS FORCE FIELD ARTICULATED. Ebonics – "black" or "dark" sonics, the use of frequencies and pitch also used to make cropcircles. 4 44 SHAPED, ACCOMPANY FLOWER-BELL, AIRLIFT ABOVE – ARRIVE AGGREGATED AS ONE [HiddenTextsOfNostradamus]

Demeter as she was in the British Museum with the "flower bell" which is the docking bell also seen as the glock of modern German scientists, and appearing on the wall of the Egyptian Hieroglyphs at Kariong N.S.W

Many thanks to Steven & Evan Strong for fighting to save the hieroglyphs on the walls at Kariong N.S.W. seen by me as a ten year old in 1958. The bell is proof these are real, what hoaxer would think to add a bell? Nor understand why... The wasp (Apis the Bee) at the top of the cartouche tells us this is 4<sup>th</sup>-5<sup>th</sup> dynasty<sup>††</sup>

8: FOUR PYRAMIDS image <sup>8</sup>

quoting words from the website:

[The4thBlackPyramidOfGiza.html](http://The4thBlackPyramidOfGiza.html)

"Here is text from Frederic Norden's book 'Travels in Egypt and Nubia' which talks of the 4<sup>th</sup> missing pyramid of Giza".

"The principal pyramids are at the east south east of Gizeh .... There are four of them, that deserve the greatest attention of the curious; for though we see seven or eight others in the neighborhood, they are nothing in comparison to the former. .... The two most northerly pyramids are the greatest, and have five hundred feet perpendicular height. The two others are much less, but have some particularities, which occasion their being examined and admired."

The image here, drawn by Frederic Norden, is a birds eye view of the Giza plateau, with the mysterious fourth black pyramid included in the top left of the picture.

Seeing that satellite mapping wasn't available for another 300 years after this image was drawn, forgive him for any minor sizing/positioning errors he might have made".

"Another of Frederic Norden's drawings showing all four of the pyramids he apparently witnessed.

The fourth pyramid has been acknowledged by experts, but only to be brushed off as a simple mistake Frederic must have made. It has been thought by many, that the pyramid that Frederic was describing was nothing more than one of the satellite pyramids located at the base of the large pyramids, but with Frederic including information about seven or eight smaller pyramids positioned around the Giza plateau ... With all of the smaller pyramids being roughly the same size, [it seems] there is no way he would have made such a careless mistake".

Does this 'Sokar' bird look like a Goose or Cygnus the swan to you? Me neither, it is Benu – Crane – GRUS – Heron - Ibis, a different constellation. The date of this hieroglyph is not hard to discern, since the first deshret 'crown' is shown here with no white hedjet crown to be seen. It is to be noted that this pheon cross is the same shown at the feet of the famous Mayan 'pilot'

Grus the Benu Crane-Heron-Ibis constellation which is the basis for the Memphis floorplan underground<sup>†††</sup> to Buceggi with the lower pointers ending at Oxyrhynchus

from the altitude of 150 km and 100 miles from Giza

clear to all that Cygnus-the Goose Returning has pointers which go quite the wrong direction to Oxyrhynchus, both for the middle three which do not fit here nor for Orion's Belt.

Since the long sharp beak of the Crane-Ibis sits at the edge of Al Faiyoum in the south, the short 'tail' fits where the Benu caves are and the long legs go all the way to Buceggi. The middle three stars sitting on the current pyramid positions, and the fourth sitting where the black pyramid once stood. According to Frederic Norden, the depiction of the black pyramid to the far left seems appropriate to where the black pyramid may have stood. This one seems to also be more in proportion to the distance to Oxyrhynchus to the south by south west, and the length of the 'legs'

are more appropriate to reaching Buceggi/Carpathia. There is, of course a good reason for these underground 'pathways' leading to the cavern base which they do, and that is the Cave of the Giants, [see 'Creation Chamber' in footnotes] which has been purloined by government authorities. All of this then raises the question 'but why have the Giza Plateau floorplan drawn and based on a constellation which is currently in the Southern Skies' ?

**Good question, and the answer IS available. The Kariong N.S.W. hieroglyphs supply part of the answer being in the south. If we look at the current view of Grus shown in the astro map image here, we will see that it works just as well or even better upside down. Even though there is no evidence that the Earth has had a 'perfect flip' causing Grus to appear in the northern skies, this at the moment may be the only indication we do have of such an event. In around 5,630BC (7,320 years ago) according to the works of Nostradamus (the time traveller), this event did occur, so much so that the pyramids on the Memphis plateau remained exactly facing north and south after the event. It was around seven thousand years ago that Peru suffered great mud periods, and that urbanisation suddenly appeared (or re-appeared).**

The agile mental leaps needed to absorb this information will force the reader to dive into immediate rejection. The same which I also am dealing with. Had I not received the six time gate visits myself, these words would not have begun. The reason for the six vists between January 2009 and October 2013 has become obvious at last. Simple physical statements of the many "conduits" of different ways of using time to see the future or the past. There is of course, much more to all of this, such as 'who was it came from Grus' for which answers a following article would be needed.

From one of the Mayan Codices. The steps represent the stages of time travel needed for a "trip" but the interesting detail here is the Crane with the "fish in its beak" – saying Oxyrhynchus

The Cartouche of Psusennes I showing the Goose Returning later to be named Cygnus ca 1000 BC

Everything about the Swan is in reverse to the Crane

## SUMMARY

1: ESTABLISHING THE VERACITY OF ZECHARIAH

SITCHIN'S WORK ON ENKI'S CLAY TABLETS via understanding the vortex mechanics of our solar system and its sister solar system which has seven celestial bodies

2: THE PRECESSION OF THE AGES – WE STILL HAVE

CENTURIES BEFORE THE AGE OF AQUARIUS realizing how we are being misled to think the zoo-diac ages consist of either '2,000' years or 2,160 years each, when it is neither!

3: HERODOTUS TOLD US IN NO UNCERTAIN TERMS that the great pyramid was never a tomb – nor was it ever built by Khufu, and in the emergency of needing channels created – why did they need the water so desperately?

4: GANTENBRINK'S CEILING

how clever of the pyramid builders at Memphis to leave us a star clock! Done in such a manner it cannot be disputed

5: THREE HUNDRED AND TWENTY FOUR YEARS

"ADDED" TO OUR CALENDAR – WE ARE IN 1691 so easy to dupe us all, to ensure all our computerised systems are out by 324 years – what else is being 'lost' due to this basic error?

6: BENNU BIRD LAYOUT AND THE PROBLEM BEING PYRE-AMID FOUR

Edgar Cayce said the floorplan of Giza was laid out as a constellation. People have been doing their level best to pinpoint which constellation, not even knowing why. For the most part searchers have not been placing themselves high enough up - nor heeding Henry Salt's Benu clues

7: "ASSIGNED TO EGYPT TO STUDY HISTORY"

almost all of the information within this article was guided by Nostradamus himself – with the answers to "who" also

8: FOUR PYRAMIDS do not an Orion's Belt make the very reason omissions are part of the entire picture too.

Answer to questions regarding the most important and valuable 'treasure' of all time is the control of time

**“Ptolemy himself declares that he altered the form of some of the constellations to give the figures a better proportion, of stars which the older astronomers had placed.**

Bayer turned the backs of the figures to the spectator instead of the faces, and Albert Durer, or some German, put them all into Gothic costume, in which they remained till the time of Flamstead. **He revised, or rather re-constructed the forms of the constellations,** and first laying down the stars themselves correctly, drew the figures according to that part of the body in which the several stars were said to be placed by Hipparchus and Ptolemy.*from Miss Frances Rolleston/in the MAZZAROTH-MIZRAIM consequently:*

The Age of Leo from around 12,500 years ago:  
(Youngr Dryass and mud filled Gobekli Tepi)  
10,373BC to ca 7,565BC = 2,808 years length  
of Cancer 7,565BC to 6,053BC = 1,512 years  
of Gemini: 8,053BC to 4,109BC = 1.944 years  
of Taurus: 4,109 BC to 1,445BC = 2,664 years  
of Aries: 1,445 BC to about 5BC = 1,440 years  
of Pisces: about 5 BC to 2,587AD = 2,592 years  
At 2015 we are actually in 1691 A.D.

<sup>7</sup> Of the twelve books of Centuries, the latter half of Centuries Seven and that of Eleven and Twelve were "surrendered to Vulcan" Nostradamus told his son Cesar in the Preface, which contains contradictions to information in the Epistle to Henri. "Vulcan" in this case is the hearth and fireplace in the home of the family of the Notredames, where these books were later discovered behind the wall. <sup>6</sup> Manticore: another word meaning 'sphinx', only this one includes the word "kore" [core], which means in essence the place in hades where the "flower bell" is contained, amongst a secure geological craton. Demeter was said to 'disappear' for half of each year, and there is a statue of Demeter with the flower-bell hovering over her head in the British museum. On the Kariong wall hieroglyphs there also appears a perfect bell – the same. This is the gloch which the German scientists reconstructed. The word 'hades' was an invention to keep ordinary folk from wandering into the path way of the Kore.

<sup>†</sup> In addition, it should be noted that the Inventory Stele (26th dynasty) informs us that Khufu repaired the headdress of the Sphinx after it had been damaged by lightning. If this is true (and there is no particular reason to doubt it), this would negate the theory that Khufu's son Khafre built the Sphinx, and it would throw up serious questions about the orthodox dating of the rest of the Giza site. Moreover, the Inventory Stele fails to make any claim that Khufu built the Sphinx or the Great Pyramid, and these surprising omissions offer considerable support to my adoption hypothesis.

'The Phoenix Solution' Alan F Alford

<sup>††</sup> 4<sup>th</sup> to 5<sup>th</sup> dynasty. The door lintel of the 19<sup>th</sup> dynasty Seti I had been plastered over showing under the plaster a Wasp (Apis the Bee constellation) and an electric light pole, an aerial refueller, helicopter, bathysphere, scout craft and Mayan numerals for "12". The aerial refueller can be seen at the top of a 5<sup>th</sup> dynasty stele in the British museum doing its task.
