

Allan Webber's Computerized Programmed Template of Quatrains lines Anagrammed from Centuries One to Ten

the £ sign is to prevent the computers automatic numbering from pre-empting the Centuries and Quatrains numbers

At the time (1,999 to 2,008) Allan was:

a) using *Cheetham's* edition and not using the Original publications which were produced while Nostradamus was still alive (i.e. 1555 & 1562) which these texts then later guided the collator to use, first having to find them, which was accomplished only thanks to some kind of miracle that access was allowed me into an Italian collector's library of the Original Works of Nostradamus and his son Filippo... Cheetham had gone to great lengths herself to ensure she had an original publication. The guidance from these computer-programmed-anagrammed-quatrains was in 5 98 1. Cheetham did seem to be using an "authentic" version, just neither of those named above... C+F+AUTHENTIC and Allan: b) had not received his 28 pages of direction - which came from these templates, such as Da Vinci's advice which can be seen in *LANGUAGE IS ENGINEERED. Guided to Da Vinci via these computerized texts.* C+F+LEONARDO (four lines which will start you on a trail - like they all do) C+F+VINCI (4 lines) and using the "U" as a "V" there is one line with UINCI within it (within 'QUINCIES' which can become KVINCI=KNIVEScut INK VEINSart = I'VE VI^{unholy} six IN, KEN^{known} SEEN^{found} SKIVE SIN VICES, SICKEN NICK, male VICKI female KIN. SINE KINES NECK-VINES Taurus to Virgo. =IS SKI ICES glaciers.

c) Other guidance relates to the use of alphabet letters in the times. There was no "W" but there was on occasion, use of two "U"s. "Q" is also "C" or "K" and "f" is "S".

◦ ARTISAN SAINT the Artisan is always Leonardo Da Vinci, noting he prefers the word "script" to the word 'texts'.

Thus - Allan has placed perfectly acceptable and desirable additional words he found, (that were not strictly in his first guidances), as lower case. This explains why there are many words appearing in lower case, which could actually be in the upper case along with their fellow words in the Template. The person who arranged the computerized words, having taken some nine years to do so, was not the same person who accomplished the Collating - hence the following lines were not found by the Anagram Programmer himself. It took the Collator another four years before the Triple Method was Disclosed.

4 44 1 Doux Gros de Mende, de Roudes & Milban (4 44 is the quatrain which gives the "to anagram" hint, line 3)

RECLAIM AUTHENTIC MDLV (1555) METRICAL/poetry line AND EDIT WRECKAGE

Other Guidance relates to Aphesis (silent letters, such as the « H » in Allah) and an « E » at the end of a word. One needs to go to the Quatrains themselves and insert their lines to see where these words came from. Also C+F+AFFRICATE such as in the word U'ACCUSTOMED or BELOV'D. In very rare instances the word INVERT appears, meaning to turn a letter upside down ! Such as a "b" to make it a "p" !

Collator = Helen Cockburn Mead-Parks (Nell) a.k.a as Coceburn, Parques, or H.C., 'anchorette', 'Lay', 'scholar' 'Æsop' 'graduate' & recently 'professor' in these quatrains.

C+F+ELOCUTION

There are two lines with this word One of which says

ATTEND TIRESOME ELOCUTION

The Jain lines which guide to the year ciphers required a forum of their own.

"ATONING MONTAGING" is probably the prime guidance. C+F+MONTAG there are three lines with this. DITROCHEE becomes another directive. There are Quatrain lines with a full stop, some a full colon smack in the middle of the line. This is saying to anagram only those words within that period marker. This is the "iambus" of the "metrical foot". C+F+ELOCUTION

The partial intent for providing this Template *which is only the basis for topic ideas* ~ is to go back to all the purple highlighted lines in the pdf forums and *highlight those lines* herein. I say "only a basis" because at a period in time some 18 years after Allan Webber began his portion of the task – it turns out that the "topic" (called "the issue" in rune casting) is gained by first *removing the letters* describing that topic. This is limited only be the knowledge of the Questioner. If the Query person does not know the word QUBITS for instance – then any information about QUBITS will not be made available by the quatræin line because the letters for QUBITS need to be removed *before* anagramming.

The purple highlighted lines are the ones which came true

The other reason for providing this Template is because I was asked to (herein) 5 71 1 ATTEND UNIQUE QUATREIN LINES VALUED AS FUTURE

HINTS: if you see "OR" it means R.O. the Regency Order of the Andromeda Council. If you see ED it means E.D. Extra Dimensional R.O. and this is *not the same* is INTER-dimensional or INTRA-dimensional – which these texts were not coded to find. There are those negative ones which inhabit "between time lines" or if you like "interred dimensional". These are Djinn/Archons and what we call Ghosts. 'Extra' means "outside" and "intra" means "crossing between" such as Che 'Ila [the male] He Rod (in these texts as HEROD) from 52,000 years of the Future Where you see UN it means U.N. in which are seated *shape shifters* from Alcyone who dwell under Antarctica. The *Fallen Ones* of AntÉchrist ALWAYS keep in mind that "F" can be "S". So that means "FINE" is usually "SINE". **Understanding this is all about frequencies.** The M.E. tool That "Q" can be "K" or "C". You will find the well hidden word CENTURIES this way That "I" can be "Y" and *vice versa* and usually relates to the changing of "i" and "y" prefix in our calendars to a number "1" That "V" can be a "U" meaning that two "V"s or two "U"s will be a VV or UU which we have as W. The person runecasting needs to do this. That a bunch of letters making no sense *can be put back thru the anagram program* again That UX and UXE are U = uranites X = joint or joined/allied, and E means the greys (and only one of thirty three types which affect Earth)

Explaining exactly what this forum [collection] is about. The following words did not arrive to the collator in the fashion you will see laid out. They arrived *all in one* line. They had to be re-arranged into a numerical order so they could at least be found by Centuries-Quatræin-Line number. After a Quatrain has been anagrammed it is called a Quatræin.

All the collator has done here is to go through the pdf forums of 2015 and 2016 and gathered those which came true, or are about to. These appear directly under the computerized version – which in most cases holds its words in no particular order. In some, the first order they arrived has been rectified somewhat. A directive received by the collator was to "*box the lines*" (into a "cassette") & to put them into *poetry foot-metric measurement* order. You will see this effect in nearly all Medieval Manuscripts, and surprisingly it does help arrive at a context! An example sits here. Lastly; *the greater portion are not worked with*, leaving you the serious reader to do so.

Noting: where the word FIFTEEN has frequently been used – it also says IS ENE E.T. NET FIEF. Meaning Reticuli fiefdom, for one example.

Au lunaire de la presente Prognostication
tion le iour commence à midy,
& fine a lautre midy.

Noting: where the word SIXTEEN has frequently been used – it also says ENS Eridanus EXIT, also meaning TENSE IX/treaty XI/Elite INSET

QUEEN TO HELEN MEAD: AIM 'MILK' QUANTUM OF OLD, UUIT OF A MONK, LIMITATION MILL=FLAUUED UUIINDS either EnLil 'lord of the winds' or the vortex system winds^{vb}

- o **QUEEN the Cassiopeians** (& see [Laura Knight-Jadczyk](#))
- o **AIMS QUITE QUIETSOME QUEEN AS MISQUOTED** aims to fool people that they are/were the Elohim cube **C+F+9 30** for video, which showed it was first another.
- o **MILL LIMITATION UUIINDS^{vb} FLAUUED** another phrase meant to be studied and which once again has been covered without the finding of this phrase first. This refers to the vortex system of our solar system which was the conclusion of the question 'Why The Hammered Bracelet Could Not Be Flown Over' the answer to which fulfilling three purposes. Telling us we are all 1)« followers » of our sun – and 2) vindicating Sitchin's works. The 'works' include Clay Tablet #10 of Enki which describes the cause of Noah's flood, the timing (Leo Rising) and the directive to Noah to collect 3). 'the seeds of all living things' ~ taking only enough livestock for the journey.
- o In other words – the Ark was a laboratory.

AIM 'MILK' QUANTUM OF OLD this quatrain line was meant to be found some time ago, in the *Noire the Wicked* forum. It was not found, hence the having to re-do this quatrain. Rather interesting that indeed the matter of the "wit of a monk" was used to indicate fraud from within a so-called "channelled" message from a so-called Plejarian, when the phrase « you have only had knowledge of quantum physics for about a hundred years » was used it automatically had my detective alert on fire, knowing that the monk Michael Psellus the Younger according to 1:42:4 had in his Cronographia of 1055A.D. written about quantum physics; even referring the reader to :~ 39 book III. "Anaxagoras of Clazomenae, the well-known Ionian philosopher of the fifth century B.C., thought that other kosmoi (universes) contemporaneous with our own might and probably did exist ad infinitum. Anaxagoras is famous for introducing the cosmological concept of Nous (mind), as an ordering force. He regarded material substance as an infinite multitude of imperishable primary elements, such as atoms, DNA, referring all generation and disappearance to mixture & separation, respectively.

 (We have seen that ING means 'the reaping' false rapture and that there is a toad within Da Vinci's art !)**

- HORNED TOAD the word 'Toad' means those reptilians from Bufo which is entwined within Boötes constellation, hence the confusion between one witness (Alec Newold) being misled and told that it is those from Boötes are in the Black Knight orbiting and the medieval painting of the pope hoeing with the background having numerous space craft flying overhead. This indicates the Vatican is in cahoots (hoeing rows) with these off worlders with the alchemye name of the *lost hoe* . The horns literally means they have horns.

Keeping in mind that at the time Allan Webber was working on programming words into his anagram machine, he did not believe in extra terrestrials and the closest he came to naming any was the word “angel”. Therefore the likes of the word MANTIS (the negative four armed giant type) or MANTIDS the positive more ordinary looking species with the Elohim Alliances of the Living Library – had for him no way of being defined – in relation to “ANTS”, “SPIDERS”, “PUPAE” and so on. It is up to you, the serious reader to qualify these details. It is only very recently[early in 2017] that the differences were made apparent to the collator, so many former forums will still contain this error

GIANT BONES IN LAND OF THE PHAROHS

Unexpected Discovery in Great Karnak Temple

LUXOR, EGYPT, Feb. 21—This day archaeologists working at the ancient temple of Karnak made a shocking and unexpected discovery. Egyptian workmen clearing embankments of sand from the ruins of a wall in this ancient site on the shores of the River Nile, have revealed the bones of a giant leaning against the masonry of old.

While many have suspected that giants roamed the ancient world, it has been the stuff only of legend and Biblical lore until this discovery was made. Now it is a certainty.

Ancient Karnak was one of the most important temple sites from the time of the Pharaohs, and indeed the great kings of this society walked the halls of the temple for centuries. It is therefore quite possible the bones were those of a pharaoh, although his identity cannot be yet determined. It is also not known why he was buried within the temple, and to this point only the upper part of the skeleton—still containing some scraps of dried tissue—have been exposed.

Henry Leichter, a photographer working nearby with epigraphers from the University of Chicago, rushed over with his equipment to take photographs.

Further work is needed to expose the skeleton more fully.
