Continues

Coded media telling us about the reversal of constellations. Hevelius died January 1687. Sextans is in reverse as are all the others Hevelius used. The Triple Method to cipher this image. A more full description appears in St GERMAIN Pt 2. **In this way the establishment could not say the astronomers "had merely copied each others' errors".** Image which is below this caption:

Floods large enough to commemorate by woodcut 1718
This would be the Wormwood event, since the bible
was collated in 1325 by the Nicean (Nicene) Council

1718 woodcut (C+F+717) this water was reported to come up from the ground

We, here sitting in the year 1346C.E., can read this media only with jaded & jaundiced eyes. Let us see what we can see. **One black sun. One disturbed sun.** Stars very close to the horizon because once upon a time in my own lifetime, the stars were never seen on or near the horizon due to our much larger atmosphere interfering. All in the darkness. The trees are a *big clue* with those reading from the left as the *first, fifth & sixth* cut down, or reading from the right, the *fifth & sixth* cut down. I would take these as *olive trees, to be read as century/ages*. We do not know without going and eyeballing the picture physically, if this is a media in reverse. Fashions? Not what we know as “Roman”, but more as “medieval”. The black globe being held has no latitudes. The horse measuring stick at half mast tells us they are measuring the calendar/season and the compass dividers are repeating that this information is about **maps**. Maps and seasons. If only we can read the text in the book. Just another clue that Güttenberg & mechanical printing or at least, his *book binding* & not as *manuscript binding*, was much earlier.

So how many such 'iron planets' do you think there are 'orbiting a 'red dwarf star'

It is not what is stated here, it is what is omitted. This is Urri, or as Nostradamus calls it, Uriah and the red 'dwarf star' is half the size of our sun, with many names

This is the pinball in the machine we need to dodge, which sends the elite on a terminal fate

Many grovelling Thanks from me to Gina Utz for pointing this out to me back in 2012 This was the proof the texts told me would "come later" regarding time travel and NostraDamus.

I had my own proof, but you didn't. Here he appears, painted by the greatest portrait painter of all time, Da Vinci, in the Last Supper. Sixteen years before he was born in J503

We have all studied that Dinosaurs become extinct 65 million years ago, but look at this strange OOPART called Acambaro figurines discovered in 1944 in Mexico which shows a human riding a dinosaur.

See herein the Angkor Wat column with a stegosaur of some kind inside what looks like a coronator visor ring

I feel sorry for those archaeologists and scholars who make findings which see them ostracised from their employment. Such as a sharp toothed dinosaur that may have been a herbivor (think Panda Bear - grass in their teeth, which dogs and cats do) and viable flesh and DNA still attached to bones on supposed fossilized skeletons.

The 9 named PLEIADES sit as an autonomous group under the "tail" of Taurus, which HAS NO HIND LEGS at all.

1. Atlas, king 2. Pleione, queen AND the 7 daughters 3. Maia, 4. Alcyone, 5. Taygeta, 6. Meriope, 7. Erra/Electra, 8. Asterope and 9. Celaeno.

There are "scholars" out there who have not had the advantage of guidance from the Elohim Alliances, in the form of Allan Webber's Template of Directives. In those directions both Allan and I were given reading matter to study. See *The Bibliography* on the Hidden Texts web site. But not only in the Template Guidance, but in the Quatrains themselves. Such as 1 42 4 "seeking the gold of the Ornament/ Nostradamus & Pfyelr" Michael Psellus the Younger/ This gold refers to both Ormus and Knowledge. The "scholar" who did this illustration was lacking in the Knowledge. Pleiades has NOTHING to do with The Hind Leg Of The Cow - an obsolete Egyptian term for Ursa Major!

The word *d'amant* does refer to other things such as black diamond which leads to sonic laser, a scalar directed energy weapon, noting in this line it is capitalized, therefore referring to a person.

Michael Psellus the Younger published *The Cronographia* & *The Daemonibus*, said by Wikipedia to have been done in 1055. Since much of this cronographic report relates to at least 300 years prior to that date, we can safely take that date with a large grain of salt. Because both Psellus and Otto were Byzantin, we *might take it as*: 55 years plus $676/1000 = J731$ in a possible pinch. This could make sense once we realize the troubled Earth events around that period, the J676 to J719 Ison/Wormwood Passing Over.

- Seps can mean Septentrion = the north
- PRECESSION refers to Precession of the equinoxes. After a discussion with my astrologer daughter, I realized how the so called precession of equinoxes has been foisted into folks' minds. If you have been following these works and my muddling through them, you will have seen I had an "epiphany" while working in *Explanation of the Prefixes in CERN PUTS CORE OFF CENTRE* (not published yet) under "Precession", as opposed to "Procession".
- SUUIFTLIER – no doubt about it, could even be worded LIAR SWIFT – first this refers to another epiphany I woke with about those from ABUS – following the discovery that obsolete Latin Abus is also Apus/Apis/Hirundo the Hummingbird-Swift-Swallow – and guess what the chain references are!

The consequence of the "EPIPHANY" searches became the pdf forum "EXPLANATION OF THE PREFIXES" in which I discovered all pre-j719 illustrations of the celestial heavens were depicted reversed to the ones we have had since that date. Including those in Cesar Notre-dame's vignettes. Just another notch in the long wooden measuring stick of proof that Nostradamus was really in J555. Julian (44-46 years older than C.E.)

- "EXPLANATION OF THE PREFIXES" has images showing the animated imaginary animals and other things that represent the different constellations. Before they had become reversed this time around, some had different names, such as Orion being known as Osiris. Or The Hind Leg Of A Cow which became The Plough, but is known as Ursa Major the Bear. People have taken the Pleiades to be the hind leg, but Pleiades sits UNDER the "tail of Taurus" and has been called the Heap and the Pile as a result. So, when I was trying to determine a decan date in Corvus – it came to me that not only was Corvus facing the wrong way, but so were its decans! The first 10 days, the second ten days of the sun crossing in front of Corvus which sits before Leo constellation (or behind depending on which way Earth is sitting in that age).
- The differences we speak of refers to a third of 2,808 years: 936 years (Millwheel Of The Ages) or two thirds into the age 1,872 years. The difference in date would then be either the third decan (last one third of Age of Leo (or 12th to 22nd August) according to the establishment idea of PRECESSION and the likes of Wikiðpedia – or in a formation of PROCESSION – the FIRST third of Leo, as in Leo Rising ... or July 23rd to 2nd August.
In this way saying the third decan makes it sound like it is further away, but if in fact the first decan it is really sooner, and that could mean an entire eleven months sooner.
- AL GORAB, devouring bird IN LEO... CORVUS THE CROW - 3rd decan (ALCHEMYE LIST OF KEY CIPHER WORDS) according to establishment LEO 3RD DECAN was CORVUS. HER=NA. CROU OR RAVEN, albeit RAVEN represents Yule.

The period of twenty seven years began with George HW Bush and ended December 2017 by D J Trump, albeit much deceit has slowed the final throes ... the "reddish water" points to high contamination, made by your beloved grubberment in the form of a fluoride agenda and now, a snake venom agenda. One which amplifies the so called "vaccine". Virus the word; means venom.

Sang, corps humain, eau rouge, & fier terre.

I just discovered that this year 1346 minus the Ison -Wormwood reported arrival of December I 680 gave it an orbit of 666 years this time. Coupled with the Deceptive Age of Pisces it bodes little good.

The Hastings-Bayeux Tapestry was NOT 1066AD which was an invented dating to make it fit other 'history'. For one thing, it took an unknown number of years to complete. Some say up to sixteen years. So, One needs to find the starting date of this sixteen years!

Neither was it 66 years plus Otto's J676/1000, which would make it J742.

For pope Gregorius; changing the calendar to suit a fiscal agenda, which in its essence is a satanic money system of kontrol, but adding one thousand years also brought the "sentence" of the negative one "cast in irons for a thousand years" to a close. We have learned in the ciphers that "Iron" refers to Mars.

First: the tapestry taking an unknown number of years to finish, work done by many different seamstresses with many levels of education or lack of education. Not forgetting the tyranny of distance. It was not like a seamstress 16 years into the project was going to send to Rome to ask "what is the current numbering fashion for indicating Roman numerals"? Or, do we spell Duke as DVX (appears as such on the tapestry) or as DVCI, (596) or "does it matter if we accidentally write the number incorrectly causing it to appear a hundred years out of context?" The comet in the tapestry came J495-6.

Second: having no gunpowder shown anywhere in the tapestry when Marco Polo took gunpowder to Europe J270's,* during Tartarian-Roman Empire reign. The Long Shields carried by cavalry also date this battle to a pre Viking period [when 1066 was a post Viking era] indeed, the Normans were the Danes "going viking/raiding". The Norman Saxe SAXIA NORTHUMBREA MAP used for the most; round and square shields to form their 'shield walls'. The square shields have been seen in use by what we call "Roman" foot soldiers. In the border of the "Bayeux" tapestry can be seen Cetus, the constellation that appears on the Tartarian flag, in reverse. What we know as China today – supposedly named after Qin Huan Di of around 200 years before the crucifixion/Passover date of J79 – also used on its flag the Cetus creature, only facing the other way! People have been mistaking this image as a Griffon. The best details we can find for PRE 600s, are the CCCC and the reversed constellations!

*We will see shortly, how we know Marco Polo was not in the 13th century. The CCCC also includes the old IIII or XXXX C+F+CANNON

Third: the matter of the *Scythian-Tartary* mercenary soldiers, of whom Xenophon wrote and *illustrated*.* He described them as a form of Greek† "Police". They wore distinctive harlequin fighting attire which is seen all through the Bayeux tapestry. This detail would date the period of Hastings much closer to the Roman Empire and what we call the Crucifixion along with Pompeii and the Sanhedrin Passover of J79CE... (formerly known as The Winged Disc, & Herculobis/Hercubolis 705BCE).

*The Art of Horsemanship by Xenophon C+F+SCYTHIAN

† Greek - what we call Greece today. It was known as Macedon, right next door to Little Tartary. See Candia map.

Fourth: in which case the dates ON the tapestry are contradictory. One of 495/6 by zodiac,** & one of i.596 (D⁵⁰⁰VC⁹⁵I) whereas 496 in those times would have still been by 'Roman' Numerals. I use the lower case i here because a letter from Church requesting a copy of *the Last Supper*, painted by the 26 years deceased Da Vinci, - to be copied as a mural on another church, the letter dated i.545.††† C+F+545 picture in later page

** by zodiac, this zodiac appears in the pdf forum... GUNS & JFK JNR pg 1 noting all the images on it are in reverse

††† This letter appears in the pdf forum ... Resets pg 1.

Fifth: We have read *at the period of Candia and Little Tartary* with "four hundred" as CCCC.* See Manuscript dated M. D.C. LXXXV^{J698}. This reads as 600 plus 98. See the **Ten** written four times? This numbering format coincided with IIII as a number 4, and CCCC as 400. More rarely do we see that archaic format after the failure of "Roman" Empire until at its last breath, it appears on the manuscript next page...

Today 698 would be shown to us as D₅₀₀ + C₁₀₀ = 600 + XC₉₀ + VIII = DCXCVIII = **698** - the very end of that Nemesis cycle, or, rather, the beginning of the next age.

Why the publisher did this is not understood, but you can bet your boots it was a form of code!

Recall it was, after all, the end of that age, the orbit of the Sanhedrin Passover. J79.CE to J719.CE.

*CCCC. We can see this date, with its illegible ninety something, written in a scroll carried by three persons on a tapestry which I will put here, depicting the very same "comet" which we see in the "Bayeux" tapestry.

J717 (C+F+718) this water was said to come up from the ground, and from the sides of such places as the Pyrenees.

Chronology of Weather Events

"... the inhabitants who built in places which by long experience they had found safe enough from any form of inundation, were by this surprised, some were drowned, together with their cattle, others only saved themselves by climbing trees or getting to the tops of houses. ...warned by the horrible noise and furious torrents of water and fled but could not escape. At the exact same time the two rivers of Adour and Cave, which fall from the Pyrenæan Hills [Pyrénées Mountains], as well as the Garonne, and some other little rivers of Gascoygne, overflowed in a similar manner and caused the same devastation. This flood was believed primarily due to the release of subterraneous waters. This observation was derived from the mineral content of the water.

On 26 June **J680**, there was a monstrous inundation near Londonderry, Ireland. *It was believed that this inundation came from the release of subterraneous waters.* **J680 – J716** was during the passing over of Ison-Wormwood.

some would say the date reads 1541. I can prove this should read 541, and that would be Julian 541. The publishing of XXXX (or CCCC) for 40 and for 400 STOPPED sometime before J598. After that date it was known as IV (4) and CD (400). The first the initials of A.D. were seen was in a graphic that showed both i527 AND A.D. raising the question why would it say "in the year of our lord 527 - year of our lord". Because it doesn't. Anno domini (year of our lord) can be Anno domini - year of domination. Or Ante diem - in front of the day The AD was seen in i527 - on the same graphic.

Helen Parks It's a deeply interesting topic to me. Would love to see links if you have any. I'm familiar with A. Fomenko's work. Curious as to the above mentioned graphic. On the origin of the Roman numerals I wasn't able to find too much so far - certainly would like to put some time in that soon. I have seen '17th (18th?) century Dutch prints on which for e v e r y '1', also those for the day of the month, a 'J' was written. This could be of course (and to me it very likely is) part of the deception, of the 'shift' that was forged and forced.

Anno domini (year of our lord) can be Anno domini - year of domination. Or Ante diem - in front of the day The AD was seen in i527 - on the same graphic. so why put "year of our lord 527, year of our lord" ?

the USE of CCCC, XXXX & IIII had CEASED by J698

NOTING THE 4 XXXX at 541
yet this purports to be M.D.XLI (1541): by that

Anno domini (year of our lord) can be Anno domini - year of domination. Or Ante diem - in front of the day The AD was seen in i527 - on the same graphic.

El Ron I am in the process of completing a pdf which summarizes other pdfs I published. I will put a lead-up pdf link here for you. My email is hiddentext@live.com.au. if you email me I will send the new pdf titled DINOSAURS & FALSE AGES. One other true researcher you might like to read is Hans Ulrich Niemitz. I can send you his work too. His work must be conjoined with Fomenko - who - because of the tyranny of distance - did not live in an age of intern-net. <http://www.hiddentextsofnostradamus.com/.../MILL WHEEL-of...>

time (not yet arrived) we have used modern numbers

When looking at published dates which begin with the 'M'; which we are ignoring. More on the basis that the date would it have been 1,541, *has not happened yet...*(we actually in 1346 CE) plus we are taking into account that the public were forced to use the M or face fines (re Sylvie Ivanova) and at the same time striking a strange conundrum here. It was not supposed to be an extra 1,000 until January of J583 according to "Great Diligence". Was a cronor visor used here, because the vatican has had cronor visors for literal ages. So, how did this document turn up 42 years before? Is it a fake? *Working on the Latin* - I noticed tucked away under that handy blob of blotted ink smudge are the letters V over M. Enigmatic isn't it. Is that secretly saying 'five over 1000'? And what would that mean! *s v means sub verbo, so if we take the V to mean "worded" and the M to indicate 1000, it then makes sense!* Studying the supposed date of *Anno M.D.XXXXI. die XXIII.* does it all look *squashed in* to you? Let us just add one minor detail. The format of numerals used such as IIII (instead of IV) & XXXX instead of XL (40) **WAS REPLACED BY THE SHORTER VERSIONS** (IV and XL) **BEFORE THE END OF THE J500'S** **BY THE TIME OF THE REAL YEAR 1000 (M), THE ROMAN EMPIRE WAS OVER FIVE CENTURIES IN THE PAST, AND THE NUMERALS AS WE KNOW THEM NOW HAD ALREADY BEEN IN USE.** Therefore this manuscript *cannot be 1,541*, so must be J541. Because it still uses the old 'Roman' format. And because pope Gregorius was 'repairing' the "pagan" Julian calendar in J582.

Can you see it? The Letters read QV [quod vide] V over M

QV ^V M

quod vide - which [to] see. (= elsewhere, in later details, take note) In other words, similar to "due diligence". Now we know why the ink blot just happened to be there. Similar alerts appear in the J499 map.

C+F+MAYBE the sun rose in the west. According to Geologist Eric Gonthier Earth turned "at least one hundred times." *Maybe more than once.* When we see such icons as the Benu- Crane-Heron (Grus) on wall reliefs... these were media of the day telling us they were "in the age of... the Ibis" which is currently a star system in the southern hemisphere... but when we see the *Goose Returning* (Cygnus) either as a walking goose or the Northern Cross of the 5th dynasty (ca 2550 BCE, the *Causeway Builders* or maybe 1440BCE, the *Exodus*) and of The Silver Pharaoh Psusennes 1036 to 989 BCE... **then we are being told which Hemisphere that dynasty inhabited - and thus, when the sun rose in the west.** THIS is the reason Hawass renamed the *Cave of the Benu* with its mummified Ibis, to *Cave of Bats*. Benu means 'south'. Grus is next to the Southern Cross. It is the long legged bird with the fish (Pisces) in its mouth, seen in Maya codices.

The word *Oxyrhynchus* means "fish in sharp beak", and this was a town on the edge of Al Faiyoum = "the Sea", which refers to that "Sea" in the southern skies containing all the nautical named stars. The wings of Benu-Crane form the lay out of four pyramids on Giza, and the long legs go along the Cave of Benu Bird on Giza, to the Giants' Base under the Caucasus Mountains at Bucegi.

So. What is wrong with this map that we find ourselves UN-learning what we have been taught?

First there is ANCIENS SCYTHES showing on a [partial] map date presented as j811. These are the same Scythians of Xenophon running from 1166 years beforehand. At first I thought the 811 must really be a 311, fiddled with... but the British Isles (Isles Britannique) were only conjoined under James I OF BRITAIN in J604. The Sarmite are known as Askhenazi today, & Scythia was supposed to have become Tartaria. See *Little Tartaria* in the CANDIA map, and we are told Candia was in existense from j204 to J669. One thing about maps is they are published by the custom of their times. For instance, sailors called Taiwan *Formosa* for a very long time after it changed names. Tea from Formosa was well known, but not as tea from Taiwan! Tea from Ceylon likewise, but not tea from Sri Lanka (1972) Just another form of changing history. PARS means “part of” and “includes” on ancient maps.

study the numerals, the two # 1s and compare to what should be a # 1 if it were 1,811; but it is not, it is j811
 Upper case J being the Catholic, lower case j = C of E

So here we have a map showing :
 SCOTEA named after an Egyptian princess
 PICTIS then across the eastern water:
 ANGLES where we think the Normans came from!!
 SAXIA NORTHUMBREA the real Saxon-Norman ...
 FRISON (Friesian) SAXONS Saxis named after Sais in Egypt – where the making of the Viking short swords came – the saxe, similar to a gladius (Bernard Cornwall)* and
 BOYAUMES DE BRETONS Stonehenge. Arthurian Breton. Recall 974 "I would be better Breton (600s) king acquaint same time as Norman".

* (Bernard Cornwall) mentions this detail in his *LAST KINGDOM* series, and I add it here because long before 2012 The Hidden Texts very briefly touched on SAIS in what we call Egypt, being the source of so-called Egyptian royal exodus. Ægypt was once known as ON formerly & as Khemet. I am sure scholars will find other names for it. It DID NOT become EGYPT until 1958! This then makes one wonder about all the '19th century' Archaeologists who called it C+F+ Ægypt, even Nostradamus. 1 40 3, 2 86 3, 377 3, 5 25 4 (J557 edition)

From memory Sais also appeared in *Quatrains Made Modern*. It may have been 8 30 2... *Faifant un puyis loing, palais d'effectacle* which followed line 1: *Dedans Tholoze non loing de Beluzer* (only it does not say Beluzar! It says Belu7.et. The '7 ET' are part of E.A.

*BOYAUMES. Fr. *Boyeaux* = narrow passage, [soldiers'] hose (stockings). Pre Tsarist Russia: *Boyar* = leader-lords of military

Quatrain 9 7 tells us to "*acquaint Breton* (*Arthurian times*) *with Norman*". For me, proof started with the **J499 Map...**

"with Norman": with the north men. When the North men, the Danes in particular, went a-viking (raiding) they became known as Vikings. In turn, as more men from the north arrived from Scandinavia gone a-viking, it seems something was sending them. In simple terms this need was taken to be just a matter of greed and lust. We know it was much more than that, a matter of survival. What we here do not allow for is the Viking period was NOT around 1,000 of anyone's calendar. Hastings Norman were vikings, and just like the so called Roman Empire, were on their last agricultural legs, and for the same reason. The reason the so called Visi-Goths made their moves too. An event we know of as Pompeii, the Sanhedrin Passover, the same of the crucifixion with its huge earthquake caused by the same that rent Vesuvius asunder. In other words – a passing 'comet'. The same seen in two tapestries, both bearing the date of the end of the 400's. J495-6. For Hastings has two very obvious details Bayeux Tapestry scholars do not seem to approach nor question.

- 1) no sign of gunpowder – which by the real so-called 1066, was well and truly a weapon of war
- 2) much of the cavalry depicted are mercenary Scythians – a form of warfare long dead by 1066

THE COMET HERE is the identical, the same one on both depictions. It came in the 400s (CCCC) with additional but unreadable Roman Numerals. This being the same century for both, would mean *Roman numerals* on the Hastings Tapestry kept at Bayeux.

mercenary Scythians in their harlequin suits

Xenophon (died around 355.BCE) wrote and *illustrated*...

There are two versions of XENOPHON - *The Art of Horsemanship*. The hardback and a paperback. The hardback has illustrations, one of which shows a Greek-Scythian mercenary somewhere around page 191, which Xenophon describes as fulfilling the office of training mercenary soldiers, their war horses, and at the same time performing police-like duties. It is the style and markings of their (the cavalry officers') unique body-wear which draws the untrained eye.

These cannot be missed, and they are identical to the same **harlequin style** worn by soldiers in the Bayeux tapestry. Also identical suits worn by **Breton king Artur** on the Modena cathedral door lintel! And see map **j811**

Xenophon himself was dated in general era up to 355 or so Before Current Era (whatever that might be), so it makes it doubly interesting that his Horsemanship and its attending cavalry protocols should have lasted so far into this side of Current Era! We might even suggest right up until the advent of gunpowder, brought back from Asia by Marco Polo before the end of his J200s. A time when shield walls, cavalry riders' long-shields and other defences of that day shortly became literally useless. When researching the evolution of guns, do keep in mind the online luminati maintains the illusion of the extra 1000 years.

On this map the Julian J appears in both upper and lower case. Since both Columbo and Magella came from the same area of the world in the same twenty years, it cant be a religious ieousus. I wonder if the lower case is a secret smub at Julian authority.*

*ieousus: when a Bull, Decree or Edict was gazetted by the Vatican- 'a copy was always presented by Rome to the Greek church'.
http://icotb.org/resources/HCC_V_03.pdf

Sir Francis Drake was sent by Queen Elizabeth Ist as a "privateer" which is a pseudonym for "sanctioned pirate", on her behalf. The Roman Empire influence was still strong and alive up until j536, a date filled with mysteries. For an entire century up to this date the empire was crashing. Not enough grazing nor crop growth to sustain cavalry abroad - imitating the Hittites and their sudden demographic move to Egypt - the most likely reason is always based on "an army cannot fight, nor sustain order, on an empty belly".

IN literature everywhere - that year j536 appears with ominous Earth changes happening, and no one reaching a final "empirical" solution. I do find the word "empirical" somewhat ironic. Neither tree rings nor ice rings are reliable. At all. Trees stop growing in ice ages, and "dust" rings in ice cores are consequent to many causes, vulcanism being only one - and those occurring more than once in any given year.

Disguised within these words is an attempt to let the reader know that the J635 map dates had later *been made much expanded*. “Year in truth gone by – voided – interfered with ...”

That the “J” which was also a “U” does refer to Julian cannot be in question. Simply because the Julian calendar of 44-J46 Before Current Era which also means to some people *Before Christian Era*, could not have been named for a person not yet born, and whose death date in J79 C.E. could not have been celebrated before his death either!

Note from author: this image is duplicated here because there is a small detail error rectified in the next, but they were screenshots

If anyone spots a date on any early map that shows AD as a suffix, please let me know. The same goes for ANY genuine media prior to the ‘nineteenth’ century, apart from the i527 which does show the A like so with the D inside the A, and both under the i527 pg 2

Can you see the dates and more important do you see the NAMES !!

So, here we have another “great diligence” relating to the media of the day... which; without Sylvie Ivanova, we would be all blindly still believing the absolute propaganda which G00GLE constitutes. We also all need to realize the tremendous *bravery & contribution* made by Nostradamus towards showing us *the way in which to determine the deceit* of such people who raise themselves above others at great expense to the population.

" *the way to determine the deceit* " – via *Great Diligence in reading his words, what he is really saying to us. And to not follow the dopey parrots who believe the negative things said about Nostradamus as a person.*

For Christosphere Celumbo to have carried the works of Marco Polo with him and return to Spain in J499, with them, then Marco Polo CANNOT have been travelling in the 13th century.

We have seen that Pieter Breughel The Elder also painted dinosaurs in his J562 *Suicide of Saul*.

Second – it could only belong to the black pyramid, the 4th one on Giza.
Third – the wings are identical to those of the C+F+Hezekiah coin, in which case it is NOT “thousands of years”, but ca 705BCE while in the South.
Fourth – these wings are “upside down” to those seen today, saying this visit was viewed when Giza was in the southern hemisphere.

Early Sunday morning, March 22nd2020, on face book, someone posted a ridiculous hoaxed video regarding Nostradamus and Ogmios. These do annoy me so much, always being based on fear factor, ignorance and unsubstantiated scholarship. The first word that hit me in the face was "economy" – a word the doctor never used in real life, living in a feudal system.

OGMIOS meaning = giant (OG) MIOS = making water- Uranite. So is this really what Orion is doing?

This video (which I am not going to promote) had an image purporting to be the doctor – but was instead, his son, Filippo.

Published y649 – 49 years after the death of Filippo, burned at an iron stake.

M. DC.XLIX

It matters not that I transcribe from someone else's transcription from the Italian, because that middle-person did not know the Triple Method. More than sheer luck must have been involved for me to find this ten year old file – to begin with.

This is not a treatise on the works of Filippo. This is only poignant proof that Filippo knew the Triple Method.

"[If] you are looking for, beyond the words, the meaning of the signs floats purposely hidden by the author... "

The days of Nostradamus – Candia (i204 to j669), TARTARIA & RVSSIA all covered in a mini ice age. Along with Scotia & Angletterre. This map is touted to be 600s yet ANGLIA is the name for England, Angletterre (3 70 9 76 & 10 100) When at this time, Britain became Great Britain Scotland and Wales under James 1st – supposedly, in i604

Here, we have the evidence of the compression of ages. The mini ice age which flowed into a Maunder Minimum has always been stated as “around 500± years duration”, with it ending shortly after Napoleon’s death, but *began* as the catalyst for the finish of the “Roman Empire”.

An army “runs on its stomach” & so does their cavalry. Reasons for ice ages include great vulcanism, or Earth turning. If Napoleon was in the j812 – j850 period, then the cold began ca. 400±. Ca. J850¹⁸⁵⁰ to ca. J950¹⁹⁵⁰ to now should only be around 1000-CF1200, not the 2000s. This discrepancy of around 800 ± is the extra 676 years too many in our calendar. It also happens to be an orbit of the Dark sun.

the date these texts say is November 5th 2022 with follow-up Yule events

Both the date of Easter and the Year of the Cat/rabbit/2023 have many mentions in the Hidden Texts, relating to a mini ice age. The word TURN appears just once in all the quatrains and presages. When they say "pole shift" it means a turn of around 5,200 nautical miles, putting Earth sideways again, with Antarctica nack under the equator, as it was in J550s. The turn seems to be a slow one, having been noticed in 2011 by the Inuit.

Coming with blades cries, weeping, tears,

Delivering final attack seeming to flee:

Parks all around platforms set up high ,

The living pushed back & murdered instantly.

➤ **Coming with blades cries, weeping, tears,** Blades = helicopters. Because 2 65 & 10 82 speak about National Parks, and here the French word "coteaux" if as "coreaux" can mean "hillside" – I believe this is pointing towards the Missing 411 of David Paulides. The three letter helicopters are not there to find the missing, they are there to make sure no one does find the missing.

➤ **Delivering final attack seeming to flee:** this can refer to a pyroclastic cloud, or a feint in a battle such as the underground fighting by the White Hat military trying to save generations of inbred human children from their satanic fate in the deep underground bases... I recommend reading LEMURIA by Richard Shaver 1945 – on Folio 7 of the Hidden Texts Website, and the DERO pdfs

➤ **Parks all around platforms set up high ,** When Yellowstone began its surging since around 2014, the ground became too hot to walk on. One would think the Parks would cordon off the entire Park for the safety of the public. But no, the Parks built platforms so the public were not aware of the reason! At the same time encouraging the public to visit National Parks. Knowing full well about strange disappearances and unusual findings hanging very high in trees.

➤ **The living pushed back & murdered instantly.** Here is the real clue. Yes, the CIA were caught at Yellowstone in 2013 planting bombs but they were prevented from simply using jump rooms to Mars, by those in the badly named Black Knight/s, sasing the Mars base jump room. You can still find the youtube video "Asteroid hits Mars October 2014". That was Plan A, and being a Plan means it would be murder! There is other technology those below have which when seen in action does look exactly like an invisible force "pushing" people back instantly. An EMP weapon. It can be seen deployed in a 2008 Arnie movie.

J542 an "upside down map"

where "south is above", yet the legends are written to be read by the viewer, correct side up

This is following the J536 volcanic episode which left the planet with almost two years of semi darkness and no summer

I have been puzzled that many maps show the land sideways, then others show it in the same cycle of centuries as upside down, and the century involved seems to be the sixth (say 592, & 496, Hastings with its reversed Cetus) sixth, the Nostradamus vignettes, showing vulpecular the Fox, Sagitta and Leo all facing the other way, but the Vallard Atlas and Piris Reis J513 map are sideways!

These details will lead to the truth regarding a middle-era visitor.

Woodcut medium is not the easiest way of medianformation.

Here is a woodcut from a witness to the †871 DARTS FROM THE SKIES which really caused the Great Chicago Fire – making one wonder if this was the case for the A°666 Great London Fire.

Since there is no such thing as 'coincidence', the very date of (J) 666 should raise ones' eyebrows.

This kind of manipulation of economical events is run by the very old secret societies we know today as the likes of Free Masons. Backed by negative Off World Trade Interests – where the Weather Making technologies derive.

Such as the Great Depression Drought. And the current Muster by flooding.

THE NEW EARTH ORBIT
378 DAY YEAR

377.8 day new elliptical Earth orbit discovered October 2013. Distances in all graphs are measured in Astronomical Units, AU. (1 AU is the earth's separation from the sun.)

The orbit graph shown above should appear approximately circular, but the new orbit is more elliptical than the current orbit.

The lower section of the new orbit graph shows that the earth will go further from the sun (to 1.11AU at apogee). The upper section shows that it will also approach the sun more closely than it currently does. This closer approach occurs during summer of the Southern Hemisphere. Consequently, summers there will be hotter and the concurrent Northern winters will be milder.

During summer of the Northern Hemisphere, the earth will be further from the sun and colder. It may seem strange, but these milder winters and cooler summers in the US and Europe are a terrible curse. Because the Southern Hemisphere is mainly ocean, the main effect of the increased solar heating in their summers will be to greatly increase evaporation from the southern oceans. Thick clouds will cover most of the earth during its "closer to the sun" part of the new orbit. The mild winters in the Northern Hemisphere and these constantly cloudy skies will produce frequent heavy snows, much like the great snowstorms that now occasionally occur in the late winter or early spring under similar conditions.

The accumulated snow will not entirely melt in the cold summers that follows

ε 502 6 2 1 En l'an cinq cens octante plus & moins, Made the year five hundred eighty less and more,
 In October the year (Julian) 582, 10 days were removed from the "Pagan Julian kalends" with the excuse
 that the lunar calendar had become out of sync with the actual seasons. Had something happened such as
 the 705BCE extra 5 day orbit* ? Had pope Gregorius really been in 1,582, he should have removed 13 days.
 Hans Ūlrich Niemitz *Middle Ages Never Happened* 1997
 10 27 3 Un Clement, Jules & Ascans recules,
 Then, in January (the new fiscal year) of (J)583, pope Gregory for an unknown reason changed the 'i' prefix to a
 number 1. The detail which is totally misunderstood these days seems to be « what did the " i " really represent ?
 Or even the lower case "j" which we see on the J499 Map – all the years numbered for the travellers are prefixed with
 a capital J except Magella, which is shown i520 – followed by the mapmaker using i600. There will be a reason for
 this – because it is also shown in the I.820 « set in stone » that I caught from an Antiques Roadshow, which has a
 capital J at the top right and a lower case j on the top left. We are told the answer to this puzzle ^{in J562 edition} 10 27 3 :
 Un Clement, Jules & Ascans recules, Clement One, set back, ^{the calendar (the first)kalends} Julius (Julian) & Ascanius, also known as iULUS

- **there is a vignette ^{page 2} showing i 527 with A and a D inside the A, under the i527. Then there was the year with no summer following J536. Both of these happened prior to J582, & must have been a world event. Notice that pope Gregory did not use Roman Numerals ? Or, at least, no one being allowed to look at Papal Bulls ^{edicts} can say; which always went to Greece at the time and not Rome : – so that the public will never discover.*
- *The first puzzle we need to investigate is the difference between J & j. We are told in 10 27 3 that there IS a difference ! But not only in the quatrain, nor even in the J499 map, but also set in stone ! That Clement the 1st was involved. From this tantalizing set of clues we can at least omit any idea it is J for Jesus, who was not yet born, or i for ieosus (Yesus) as some scholars are struggling to prove. **See the 1.820 hint here.***

To get this video type into your non GOOGLE search engine: What did Leonardo da Vinci's "Last Supper" really look like? | DW . published in the Hidden Texts 2020/1344 today is May 1346/2022

currently re-searching why the i prefix seems to appear in Tudor time/places and why the lower case j prefix is used instead of the i or the capital J for Julian FOR THOSE OF YOU WHO STILL DO NOT BELIEVE WE ARE ACTUALLY IN 1344. Ante. Diem. which means Before the Day of the next reset – here is a letter related to a copy of the LAST SUPPER being sent to a church because the Original was a wall frieze. The Original was completed i487 DaVinci died in i519 & this letter about Da Vinci's companion arranging the copy is dated i545

The Tudor "England" Map (C+F+590) does not show the word England, but Anglia so saying by OUR COMPREHENSION OF HISTORY taught to us, that it may not have been the Church of England Henry 8th devised, if it was ANGLIA right up to Queen Elizabeth First, her demise in i603, when James 1st took over. And known as Angleterre

GENERAL OFFICER SAID: DATES ARE EFFICIENTLI JOINED

Here is something extremely interesting, spotted last night (January 1 2017) on the Antiques Roadshow, a very old program because Tim Wanacott is one of the experts. <-This is very early in the 1800's (when very late in the 1700s [1795] I spotted a date on an object which still held the "j" as a prefix) and it strikes me that someone was trying to leave a strong clue here. See the "j" and the "J" as the heading ? Now look at the full stop after the number one in the date. All pointers contain eight or 16 'spokes'. Set in stone.

Presuming the Engraver was a human, then this engraver actually eyeballed these various animals

The peoples said to have inscribed these stones are believed to have lived among the 500s. (j500s) The same i500s of a letter asking for a copy of the Last Supper.

This fits with Peter (Pieter) Breughel The Elder who painted the Suicide of Saul, with domesticated Brontosaurus in the background, being ridden.

How do we know they were domesticated, meaning bred for the purpose? Some show large white patches on their hides. This happens when inbreeding animals kept in captivity, such as mink.

Titled "the earliest and largest cannon" Tsarist built and dated "1586" which was really J586 (it was only J582 that the extra 1000 years was added to the calendar) - but August J346 at Crecy saw the first war cannon used in the western hemisphere; even though the Mameluk were thought to use one in 260 (this would fit with Polo returning to write about it in J271)

These are important dates to work with the Hastings battle scenes in the Bayeux Tapestry. There is not the barest sign of gunpowder in the field. Mis-stated by many as 1066 it would NOT have taken from J271 to "1066" to invent muskets...

The shields used by the cavalry and military in the tapestry would hardly fend off projectiles fired using gunpowder!

Yet Nostradamus used the word "cannon" in the written works before J566 in 3 37, 3 84, 9 14, 9 28 and 11 3, was he predicting? Before he did, Leonardo Da Vinci also wrote regarding cannon, around i470. Was he also prophecying?

Cepheus, with Branches in his Arm

top right:

Lionman of the winds – Enlil/yhwh, to the right tentacled object hovering. Could be saying 'don't breathe on me'

Central man holding Black sun with another in the sky. Is this Zeus ?

Sagittarius is facing the post J686 direction, but Taurus sits in the *pre* J686 position, with Pisces* also in that old direction because this includes the Hastings tapestry-Tartarian flag Cetus in reverse.

Leo Rampant is not reclining but is facing today's way.

The Branches being held represent DNA-lineages except for the bottom left which holds the **Fleur-de-lis** of electricity and what looks like a quiver but is seen in many

Nazi Empire depictions. **A weapon**

bottom right :

he is holding shew-Bread/ormus/ monatomic Gold.

The central figure holding of the right hand is in the opposite to the top right... what does that mean?

cancer in the day of Nostradamus, was a *crayfish*, which changed to a *crab* (as we know it) around the same time as IIII became IV. So when did it change to a crayfish from a seabug ?

*Celtic Pisces seems to depict more of Cetus and less of Formalhaut of Pisces – this fits with the Celtic Zodiac itself which does not sit exactly on current zodiac dates, indicating a shift in ^{C+F+}precession. This zodiac here is in fact, the Celtic Zodiac. Dating this from ±705BCE to J686C.E. The term "Roman Empire" boundaries has not been explained to folk properly at all.

Old (previous era) CELTIC Zodiac dates

- Aries** April (Willow) April 15 to May 12. First month of Pagan year ^{The Head}
includes spring, Beltane, the first week in May
- Taurus** May (Hawthorn) May 13 to June 9 (The Neck) currently Taurus begins April 22nd
- Gemini** June (Oak) June 10 to July 9. (The Arms) currently Gemini begins May 22nd
- Cancer** July (Holly) July 8 to August 4 (The Chest) currently Cancer begins June 21st solstice
interesting that the winter Yule tree Holly (for us in this era) was once in our summer,
recall Otto had made July as Yule in J676... and why is it July 8th instead of July 10th?
- Leo** August (Hazelnut) August 5 to September 1st (The Heart) currently begins July 21st
- Virgo** September (Elm/GrapeVine) September 2 - September 29 currently begins August 23rd
- Libra** October (Ivy) September 30 to October 27, (kidneys,shins) currently begins September 22nd
- Scorpio** November (Reed) October 28 (Yew) to November 24 currently begins October 21st
- Sagittarius** December (Elder) November 25 to December 22 (thighs) begins November 22nd
- Capricorn** (Birch) December 24^{23rd} was solstice to January 20. (knees) begins December 22nd
- Aquarius** (Rowan) Dragon tree? January 21 to February 17 (ankles) currently begins January 21st
- Pisces** (Ash tree) February 18 - March 17 (The Feet) equinox was the 20th currently begins February 22nd

In Part 3 there is a collection of pre Nostradamus zodiacs which will be compared

1603 Chavigny published, with Pleiades' 9 stars – all in reverse to how they appear today. Bridge is stargate through heaven. j 603

The last time "comet" "Ison" came towards Earth the weather witnessed from [y672](#) was as crazy as it is now. Here is a short summary from:

A Chronological Listing of Early Weather Events by nuclear physicist James A. Marusek/ impact@hughes.net (www.breadandbutter-science.com) page 444

"The weather for the period of the previous comet Ison in **December I680**"

Being a retired nuclear physicist, Marusek would be in the know regarding incoming visits by celestial bodies. This **I680** as an entry he never showed again C+F+686

Winter of I680 /I681 A.D. In 1680 in *England*, the frost was long and hard.^{47, 72, 93} The winter was intensely cold in all *Europe*.

The Little and Great Belts in *Denmark* were frozen, and many people perished.¹ This year the cold was so severe as to split whole forests of oak trees.³⁰

In I680 in southern France, the cold kills all the olive trees.⁷⁹

In I681 A.D. England, all the spring and summer was dry.^{47, 72}

Winter of I681 /1682 A.D. In the *United States*, on 11 December 1681, the Delaware River near Philadelphia was **frozen solid in one night so as to be passable on the ice.**

France is 'next door' to Greece, so how come the Greek olive trees did not all die too? Greece boasts olive trees of thousands of years in age

C+F+PREUPDATE the paragraph which does not appear in any of Marusek's "updates" above

check out the fashions, William the Bastard is supposedly at the bottom, (said the narrator, but Normandy has at times been all of the French coast, and thought by many scholars to mean the *north* of France) (and **WILLS** looks far too skinny to be the corpulent king) this spot seems quite close to Bretagne/Brittany of the Bretons. they *are* wearing 6TH to 8TH century armour, but the *clothing* appears *prior to the* I500s - 6th century of English king Henry VIII (think neck ruffles and how they evolved at court and Shakespeare of the i600s, the 7th century)

AND JUST EXACTLY WHAT IS THIS?

I can hear "experts" parroting "shield"

no where in any of the 84 panels does any warrior carry a shield which looks like this

See the apparel of the Giant on the left – it is the Scythian harlequin suit – detailed in the Hastings Tapestry, which if Hastings HAD been sometime around I066 (allowing for time to actually stitch it) then where is the gunpowder? Where are the muskets? C+F+ Marco Polo returning to Europe in the late third century with gunpowder; tells me that never in the history of warfare has a defining technology such as gunpowder over spear and swords – taken so long to develop!
